

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. ABSTRACT OF PROCEEDINGS
OF THE
ILLINOIS STATE BOARD OF HEALTH, 1888.

ABSTRACT OF THE PROCEEDINGS
OF THE
ILLINOIS STATE BOARD OF HEALTH
AT THE
MEETINGS DURING THE YEAR 1888.

ANNUAL MEETING, SPRINGFIELD, JANUARY 12-13, 1888.

The eleventh annual meeting of the ILLINOIS STATE BOARD OF HEALTH was held in the rooms of the BOARD in the capitol building at Springfield, on Thursday and Friday, January 12 and 13, 1888.

Present: W. A. Haskell, R. Ludlam, A. L. Clark, W. R. Mackenzie, Newton Bateman, H. V. Ferrell and John H. Rauch.

Dr. Haskell, President of the BOARD, in the chair.

In the regular order of business the minutes of the quarterly meeting, held October 18, 1887, were read and approved. Upon the call for reports of officers, the Secretary presented his report for the quarter ended December 31, 1887, and his annual summary for the year 1887.—*See Tenth Annual Report*, pp. xxix-L inclusive.

* * * * *

In accordance with the recommendations of the Secretary relative to the investigation into the sources of and remedy for the pollution of streams, and the character of the water supply of cities, towns and villages, the following resolution offered by Dr. Ludlam, was adopted, to-wit:

Resolved, That the necessary preparations be made to carry out the recommendations of the Secretary in his quarterly report in regard to the investigation of water supplies and the pollution of streams, and also with reference to the sanitary surveys, with a view to placing the State in the best possible sanitary condition during the coming summer.

* * * * *

Charges affecting the good standing of the Toledo Medical College, of Toledo, Ohio, having been lodged with the BOARD, Dr. Jonathan Priest, a member of the faculty of said college, appeared before the BOARD and submitted a written statement with accompanying documents in explanation and refutation of the charges made. After a lengthy and full hearing of the case it was decided that upon a strict compliance with the requirements of the BOARD, its diplomas would be recognized.

* * * * *

The reappointment of Dr. W. A. Haskell as a member of the BOARD and as his own successor, was announced.

The annual election of officers for the ensuing year resulted as follows:

President—Dr. W. A. Haskell, Alton.

Secretary—Dr. John H. Rauch, Chicago.

Treasurer—Dr. A. L. Clark, Elgin.

On motion, Drs. W. R. Mackenzie and H. V. Ferrell were appointed Auditing Committee.

The BOARD proceeded to the rehearing of the application of H. D. Flower, an itinerant practitioner, of Fulton, Whiteside county, for a certificate. Charges of "immoral, unprofessional and dishonorable conduct" having been preferred against him, the said Flower accompanied by counsel appeared before the BOARD.

The charges specified in eleven counts were read, and counsel on behalf of Flower, denied some of them, admitted others in part and one wholly.

The complaints, referring to the acts of the said Flower covering a period of about thirty years, and coming from most of the counties in central and northern Illinois, were submitted in detail, and on presentation to counsel for Flower he declined to examine same. After discussion between counsel for Board,

members and counsel for Flower, the following resolution offered by Dr. Bateman was adopted, to-wit:

Resolved, That this BOARD declines to issue a certificate to practice medicine to H. D. Flower until such time as the said Flower shall present to the BOARD satisfactory evidence that the charges made against him are untrue.

It was decided to furnish counsel for Flower all the complaints on file with the BOARD against the said Flower, taking his receipt therefor, and giving him all the time desired to satisfactorily refute same as per resolution offered.

In the matter of the application of G. B. Walker, of Chicago, a cancer specialist, for a certificate, the said Walker and counsel appeared before the BOARD and made answer to charges filed with the BOARD of "unprofessional and dishonorable conduct." After the reading of the charges and the hearing of answer thereto and a full consideration of the case, it was disposed of in like manner as the application of Flower.

* * * * *

The Auditing Committee, to whom had been referred the financial statement of the BOARD for the fiscal year ended September 30, 1887, showing expenses of BOARD for said period to have been \$12,615.08, reported same back as correct and it was received and ordered filed for record.—*See Tenth Annual Report*, page LI.

They also reported back the report of the Treasurer for same year attested as correct, and it was received and ordered filed for record.—*See Tenth Annual Report*, page LII.

The committee also reported bills for quarter ended December 31, 1887, amounting to \$2,755.69, as correct, and recommended that they be paid, and it was so ordered.

The remainder of the session was devoted to the consideration of matters pertaining to the Medical Practice Act, and at 3:30 o'clock P. M., Friday, January 13, the Board adjourned.

QUARTERLY MEETING, AT CHICAGO, APRIL, 1888.

The regular quarterly meeting of the ILLINOIS STATE BOARD OF HEALTH was held at the Grand Pacific hotel in the city of Chicago, on Thursday and Friday, April 19 and 20, 1888.

Present: A. L. Clark, W. R. Mackenzie, H. V. Ferrell, John H. Rauch—Dr. Clark presiding, in the absence of the President.

In the regular order of business the minutes of the last regular meeting (January, 1888,) were read and approved.

The Secretary presented his quarterly report, as follows:

QUARTERLY REPORT OF THE SECRETARY.

Notwithstanding the exceptional severity and sudden and marked changes of the meteorological conditions which occurred during the quarter ended March 31, 1888, there has been no serious increase of the mortality rate, as a whole, nor have the diseases which assume an epidemic form prevailed to an unusual extent. The mean temperature for the quarter has been from five to eight degrees lower throughout the State than for any corresponding period during the last fifteen or twenty years—the figures varying between these extremes in various localities.

The most serious result of this unusual cold and the sudden changes was manifested during the month of March, when pneumonia and other pulmonary diseases became rife and caused a marked increase of the death-rate, especially among the aged. The result of these meteorological influences is, however, hardly measured by the increased mortality; they have depressed vitality generally and impaired the powers of resistance to other diseases, so that the standard of the public health is materially lowered, and the vital condition of the community at the

of the quarter is poorly calculated to withstand the invasion of an epidemic disease, should the contagion of such disease be allowed to effect a lodgment.

Scarlet fever has been reported at Reddick, Nokomis, Nauvoo, Normal, DeLand, Philo, Nebo, Niantic, Bardolph, Collinsville, Hoopeston, Pana and Springfield. Diphtheria at Ottawa, Quincy, Baileyville, Mt. Morris, Hillsboro, Aviston, Franklin Grove, Hoopeston, Fairmount, Plainview, Collinsville, Vandalia, Chicago and Harrisburg. Measles at Creel's Springs, Paris, Chester, Adrian, Litchfield and Ferris; pulmonary complications are the sequelæ in many instances, unusually severe, and during the coldest periods there were a number of fatal cases—in one locality, in Williamson county, out of a population of between four and five hundred, there were some twenty deaths from this, usually non-fatal disease. Typhoid (enteric) fever was also reported at St. Jacobs.

Small-pox:

Only two new cases of small-pox occurred during the quarter; one of these was in the Chicago bridewell, the inmates of which were at once vaccinated, and no other case resulted. The other occurred at Alton—disease probably contracted either in Kansas or St. Louis—symptoms so obscure that the attending physician (Dr. Haskell, President of the BOARD), requested me to assist in forming a diagnosis. Even on the fourth day a positive diagnosis was not warranted, but the case was treated as suspected from the beginning; the usual precautions were observed, and no other case followed.

The outbreak at Clinton, reported in the last quarterly, was suppressed without any spread beyond the immediate family, and no other case resulted from the case of varioloid at Decatur.

Since the close of the quarter a case has been introduced into Bond county, near Greenville, which has caused much uneasiness. The disease was contracted in Kansas, from a man just returned from Los Angeles, Cal.; in the house where he stopped was a young lady teacher, who was vaccinated with the other inmates of the house, and on being taken ill started for her home in Illinois. She was then in the febrile stage, and arrived at Greenville, April 1, in the eruptive stage, and on the following
when Dr. Allen, the physician, was called he found the

vaccinia and the variolous disease progressing together. An unknown number of persons must have been exposed to the contagion during her railroad travel and her stay in St. Louis, as well as after her arrival in Greenville. On learning the facts I telegraphed an order for a supply of vaccine to Greenville from Chicago, and visited the locality in person on the 4th inst. The precautions set forth in the preventable disease circular of the BOARD were thoroughly enforced by the local authorities, and no other case has yet developed in the locality.*

The widespread prevalence of this disease, at the present time, both in this country and abroad, and the continued arrival of unprotected immigrants—frequently with the disease existing among them—should admonish the community of the imminent danger of another epidemic similar to that of 1881-83. The lesson of that experience—with its awful aggregate of 2,932 lives sacrificed and its tale of suffering and permanent disability of survivors; its total cost of \$4,403,968.43; its quarantines and other interruptions of business and personal intercourse—has largely faded out of the public mind. Many localities do, it is true, still enforce the vaccination of school children, and may be regarded as fairly well protected against the contingency of a small-pox epidemic. But there are many more in which this precaution has been suffered to lapse, and there is now an accumulation of unprotected individuals sufficient to furnish the material for a serious epidemic, and there is always in every community an indeterminate number whose susceptibility to the small-pox contagion can be destroyed only by repeated and frequent vaccination.

The conditions which threaten, render it imperative that the public should be again informed of the substantial security from small-pox which efficient vaccination affords; and the time is now opportune for a general enforcement of the school vaccination order of the BOARD. Since the publication of the recent report of the BOARD on this subject I am in receipt of numerous letters from school officials, health officers and parents asking that the BOARD again exert its influence to secure a wholesale vaccination of the State such as resulted so successfully in arresting the ravages of the last small-pox epidemic.

* During the session of the BOARD, information was received of the importation of another case into the State. The disease was contracted in Colorado, and developed after the return of the patient to her home in Reno, Bond county.

It is entirely possible to make Illinois small-pox proof in a fortnight. But to do this requires that the individual citizen, as well as the school authority and health officer, do his part in the work. It is the duty of every householder to see to the vaccinal protection of himself and of every inmate of his household.

As a powerful method of arousing interest in this matter there can be nothing better than the enforcement of the school-vaccination order, and I have to suggest that the necessary action to this end be had during the present meeting of the BOARD, so that advantage may be taken of the favorable season of the year for performing the operation.

Water Supplies:

Considerable preliminary work has been done toward the investigation of the water supplies of the State, in connection with the Sanitary Survey, although owing to the pressure of other duties I have not been able to make the personal visits, which I find will be necessary, to the various localities in order to secure the proper collection of the samples for the chemical and biological examinations.

In furtherance of the project for collecting and utilizing the data concerning the borings, shafts and wells sunk in various parts of the State, the following circular has been prepared.

ILLINOIS STATE BOARD OF HEALTH.

OFFICE OF THE SECRETARY.

MY DEAR SIR:

As is well known, the dry summer weather of the last two years was productive not only of much sickness, but of great, and in some cases disastrous, losses to the farmer and stock breeder, to railroads and to manufacturing industries. The rainfall—lighter than for many years—was not sufficient to keep ponds, springs, wells and water-courses pure and wholesome, and in many places they dried up entirely.

Although the drouths during these two seasons were more general and more protracted than any which have occurred since the Signal Service began its observations in this State, an examination of these observations shows that dry seasons of an extent sufficient to cause much distress are not uncommon. Anything which may be done to remedy this condition and to guard against its evil results would, therefore, be a public benefit.

There is good reason to believe that the much greater development of our underground water-supplies is entirely feasible. These are, practically, inexhaustible, and when reached furnish the purest of waters. There are distinct water-bearing strata underlying large areas of the State at

different depths, varying with the geological formation, as in the alluvium, in the drift and in the quaternary deposits. Much scattered information concerning these subterranean reservoirs has already been obtained through the results of borings in prospecting for coal, oil, salt, natural gas, etc., and in the sinking of wells, shafts and mines.

The STATE BOARD OF HEALTH desires to collect this information, and to utilize the data thus obtained, in compiling a report and constructing a chart showing the depth from the surface, of the different water-bearing strata in every part of the State where they exist, describing the character of the water of each stratum, its pressure, etc.

Such a report and chart would have great value for towns and villages, for farmers, stock raisers, manufacturers and others, in indicating where to bore for water, the necessary depth, the quality and quantity which may be found, etc. It would also indicate localities where existing supplies might be improved by sinking wells to a lower stratum. In some places it might show that the underground supply is, practically, inaccessible; in others, that the quality is not suitable for a given purpose, as where it is heavily sulphuretted or strongly saline or alkaline. In such cases it would, at least, save useless expense.

In order to make the information thus obtained available, the BOARD has secured the services of Dr. Theo. B. Comstock, of the State University, a competent geologist, who has already given much practical attention to these matters in Illinois, and in several other states.

In the absence of adequate State appropriations for such work, the BOARD is obliged to rely greatly upon the people of the State to assist in the collection of these data relating to borings, and for such other facts as may be useful in determining the character of rock formations in various localities.

The enclosed blank, prepared by Dr. Comstock, is sent you with the request that you will record upon it such information as you may be able to give regarding wells, borings, and similar excavations in your neighborhood, as well as details of your own experience in relation to topography, natural drainage, water-supply, and the history of your district in so far as it may bear upon these points.

Very respectfully,

JOHN H. RAUCH, *Secretary.*

[*Copy of Blank.*]

Report No......

Character.....

INSTRUCTIONS.

Fill out the numbered blank spaces below as follows: 1, Well, boring or shaft; 2, name of town; 3, name of county; 4, name of owner of property, and location; 5, measurements; 6, purpose, as for water, coal, natural gas, c.; 7, name of contractor, and month and year of work; 8, facts of interest in prosecution of the work. (If this space is not sufficient copy back of the blank.) 9, name of strata in the order as met, with feet of each in feet and inches.

ABSTRACT OF THE PROCEEDINGS
OF THE
ILLINOIS STATE BOARD OF HEALTH
AT THE
MEETINGS DURING THE YEAR 1888.

ANNUAL MEETING, SPRINGFIELD, JANUARY 12-13, 1888.

The eleventh annual meeting of the ILLINOIS STATE BOARD OF HEALTH was held in the rooms of the BOARD in the capitol building at Springfield, on Thursday and Friday, January 12 and 13, 1888.

Present: W. A. Haskell, R. Ludlam, A. L. Clark, W. R. Mackenzie, Newton Bateman, H. V. Ferrell and John H. Rauch.

Dr. Haskell, President of the BOARD, in the chair.

In the regular order of business the minutes of the quarterly meeting, held October 18, 1887, were read and approved. Upon the call for reports of officers, the Secretary presented his report for the quarter ended December 31, 1887, and his annual summary for the year 1887.—*See Tenth Annual Report*, pp. XXIX-L inclusive.

* * * * *

In accordance with the recommendations of the Secretary relative to the investigation into the sources of and remedy for the pollution of streams, and the character of the water supply of cities, towns and villages, the following resolution offered by Dr. Ludlam, was adopted, to-wit:

—R

Resolved, That the necessary preparations be made to carry out the recommendations of the Secretary in his quarterly report in regard to the investigation of water supplies and the pollution of streams, and also with reference to the sanitary surveys, with a view to placing the State in the best possible sanitary condition during the coming summer.

* * * * *

Charges affecting the good standing of the Toledo Medical College, of Toledo, Ohio, having been lodged with the BOARD, Dr. Jonathan Priest, a member of the faculty of said college, appeared before the BOARD and submitted a written statement with accompanying documents in explanation and refutation of the charges made. After a lengthy and full hearing of the case it was decided that upon a strict compliance with the requirements of the BOARD, its diplomas would be recognized.

* * * * *

The reappointment of Dr. W. A. Haskell as a member of the BOARD and as his own successor, was announced.

The annual election of officers for the ensuing year resulted as follows:

President—Dr. W. A. Haskell, Alton.

Secretary—Dr. John H. Rauch, Chicago.

Treasurer—Dr. A. L. Clark, Elgin.

On motion, Drs. W. R. Mackenzie and H. V. Ferrell were appointed Auditing Committee.

The BOARD proceeded to the rehearing of the application of H. D. Flower, an itinerant practitioner, of Fulton, Whiteside county, for a certificate. Charges of "immoral, unprofessional and dishonorable conduct" having been preferred against him, the said Flower accompanied by counsel appeared before the BOARD.

The charges specified in eleven counts were read, and counsel on behalf of Flower, denied some of them, admitted others in part and one wholly.

The complaints, referring to the acts of the said Flower covering a period of about thirty years, and coming from most of the counties in central and northern Illinois, were submitted in detail, and on presentation to counsel for Flower he declined to examine same. After discussion between counsel for Board,

members and counsel for Flower, the following resolution offered by Dr. Bateman was adopted, to-wit:

Resolved, That this BOARD declines to issue a certificate to practice medicine to H. D. Flower until such time as the said Flower shall present to the BOARD satisfactory evidence that the charges made against him are untrue.

It was decided to furnish counsel for Flower all the complaints on file with the BOARD against the said Flower, taking his receipt therefor, and giving him all the time desired to satisfactorily refute same as per resolution offered.

In the matter of the application of G. B. Walker, of Chicago, a cancer specialist, for a certificate, the said Walker and counsel appeared before the BOARD and made answer to charges filed with the BOARD of "unprofessional and dishonorable conduct." After the reading of the charges and the hearing of answer thereto and a full consideration of the case, it was disposed of in like manner as the application of Flower.

* * * * *

The Auditing Committee, to whom had been referred the financial statement of the BOARD for the fiscal year ended September 30, 1887, showing expenses of BOARD for said period to have been \$12,615.08, reported same back as correct and it was received and ordered filed for record.—*See Tenth Annual Report*, page LI.

They also reported back the report of the Treasurer for same year attested as correct, and it was received and ordered filed for record.—*See Tenth Annual Report*, page LII

The committee also reported bills for quarter ended December 31, 1887, amounting to \$2,755.69, as correct, and recommended that they be paid, and it was so ordered.

The remainder of the session was devoted to the consideration of matters pertaining to the Medical Practice Act, and at 3:30 o'clock P. M., Friday, January 13, the Board adjourned.

QUARTERLY MEETING, AT CHICAGO, APRIL, 1888.

The regular quarterly meeting of the ILLINOIS STATE BOARD OF HEALTH was held at the Grand Pacific hotel in the city of Chicago, on Thursday and Friday, April 19 and 20, 1888.

Present: A. L. Clark, W. R. Mackenzie, H. V. Ferrell, John H. Rauch—Dr. Clark presiding, in the absence of the President.

In the regular order of business the minutes of the last regular meeting (January, 1888,) were read and approved.

The Secretary presented his quarterly report, as follows:

QUARTERLY REPORT OF THE SECRETARY.

Notwithstanding the exceptional severity and sudden and marked changes of the meteorological conditions which occurred during the quarter ended March 31, 1888, there has been no serious increase of the mortality rate, as a whole, nor have the diseases which assume an epidemic form prevailed to an unusual extent. The mean temperature for the quarter has been from five to eight degrees lower throughout the State than for any corresponding period during the last fifteen or twenty years—the figures varying between these extremes in various localities.

The most serious result of this unusual cold and the sudden changes was manifested during the month of March, when pneumonia and other pulmonary diseases became rife and caused a marked increase of the death-rate, especially among the aged. The result of these meteorological influences is, however, hardly measured by the increased mortality; they have depressed vitality generally and impaired the powers of resistance to other diseases, so that the standard of the public health is materially lowered, and the vital condition of the community at the

of the quarter is poorly calculated to withstand the invasion of an epidemic disease, should the contagion of such disease be allowed to effect a lodgment.

Scarlet fever has been reported at Reddick, Nokomis, Nauvoo, Normal, DeLand, Philo, Nebo, Niantic, Bardolph, Collinsville, Hoopeston, Pana and Springfield. Diphtheria at Ottawa, Quincy, Baileyville, Mt. Morris, Hillsboro, Aviston, Franklin Grove, Hoopeston, Fairmount, Plainview, Collinsville, Vandalia, Chicago and Harrisburg. Measles at Creel's Springs, Paris, Chester, Adrian, Litchfield and Ferris; pulmonary complications are the sequelæ in many instances, unusually severe, and during the coldest periods there were a number of fatal cases—in one locality, in Williamson county, out of a population of between four and five hundred, there were some twenty deaths from this, usually non-fatal disease. Typhoid (enteric) fever was also reported at St. Jacobs.

Small-pox:

Only two new cases of small-pox occurred during the quarter; one of these was in the Chicago bridewell, the inmates of which were at once vaccinated, and no other case resulted. The other occurred at Alton—disease probably contracted either in Kansas or St. Louis—symptoms so obscure that the attending physician (Dr. Haskell, President of the BOARD), requested me to assist in forming a diagnosis. Even on the fourth day a positive diagnosis was not warranted, but the case was treated as suspected from the beginning, the usual precautions were observed, and no other case followed.

The outbreak at Clinton, reported in the last quarterly, was suppressed without any spread beyond the immediate family, and no other case resulted from the case of varioloid at Decatur.

Since the close of the quarter a case has been introduced into Bond county, near Greenville, which has caused much uneasiness. The disease was contracted in Kansas, from a man just returned from Los Angeles, Cal.; in the house where he stopped was a young lady teacher, who was vaccinated with the other inmates of the house, and on being taken ill started for her home in Illinois. She was then in the febrile stage, and arrived at Greenville, April 1, in the eruptive stage, and on the following day, when Dr. Allen, the physician, was called he found the

vaccinia and the variolous disease progressing together. An unknown number of persons must have been exposed to the contagion during her railroad travel and her stay in St. Louis, as well as after her arrival in Greenville. On learning the facts I telegraphed an order for a supply of vaccine to Greenville from Chicago, and visited the locality in person on the 4th inst. The precautions set forth in the preventable disease circular of the BOARD were thoroughly enforced by the local authorities, and no other case has yet developed in the locality.*

The widespread prevalence of this disease, at the present time, both in this country and abroad, and the continued arrival of unprotected immigrants—frequently with the disease existing among them—should admonish the community of the imminent danger of another epidemic similar to that of 1881-83. The lesson of that experience—with its awful aggregate of 2,932 lives sacrificed and its tale of suffering and permanent disability of survivors; its total cost of \$4,403,968.43; its quarantines and other interruptions of business and personal intercourse—has largely faded out of the public mind. Many localities do, it is true, still enforce the vaccination of school children, and may be regarded as fairly well protected against the contingency of a small-pox epidemic. But there are many more in which this precaution has been suffered to lapse, and there is now an accumulation of unprotected individuals sufficient to furnish the material for a serious epidemic, and there is always in every community an indeterminate number whose susceptibility to the small-pox contagion can be destroyed only by repeated and frequent vaccination.

The conditions which threaten, render it imperative that the public should be again informed of the substantial security from small-pox which efficient vaccination affords; and the time is now opportune for a general enforcement of the school vaccination order of the BOARD. Since the publication of the recent report of the BOARD on this subject I am in receipt of numerous letters from school officials, health officers and parents asking that the BOARD again exert its influence to secure a wholesale vaccination of the State such as resulted so successfully in arresting the ravages of the last small-pox epidemic.

* During the session of the BOARD, information was received of the importation of another case into the State. The disease was contracted in Colorado, and developed after the return of the patient to her home in Reno, Bond county.

It is entirely possible to make Illinois small-pox proof in a fortnight. But to do this requires that the individual citizen, as well as the school authority and health officer, do his part in the work. It is the duty of every householder to see to the vaccinal protection of himself and of every inmate of his household.

As a powerful method of arousing interest in this matter there can be nothing better than the enforcement of the school-vaccination order, and I have to suggest that the necessary action to this end be had during the present meeting of the BOARD, so that advantage may be taken of the favorable season of the year for performing the operation.

Water Supplies:

Considerable preliminary work has been done toward the investigation of the water supplies of the State, in connection with the Sanitary Survey, although owing to the pressure of other duties I have not been able to make the personal visits, which I find will be necessary, to the various localities in order to secure the proper collection of the samples for the chemical and biological examinations.

In furtherance of the project for collecting and utilizing the data concerning the borings, shafts and wells sunk in various parts of the State, the following circular has been prepared.

ILLINOIS STATE BOARD OF HEALTH.

OFFICE OF THE SECRETARY.

MY DEAR SIR:

As is well known, the dry summer weather of the last two years was productive not only of much sickness, but of great, and in some cases disastrous, losses to the farmer and stock breeder, to railroads and to manufacturing industries. The rainfall—lighter than for many years—was not sufficient to keep ponds, springs, wells and water-courses pure and wholesome, and in many places they dried up entirely.

Although the drouths during these two seasons were more general and more protracted than any which have occurred since the Signal Service began its observations in this State, an examination of these observations shows that dry seasons of an extent sufficient to cause much distress are not uncommon. Anything which may be done to remedy this condition and to guard against its evil results would, therefore, be a public benefit.

There is good reason to believe that the much greater development of our underground water-supplies is entirely feasible. These are, practically, inexhaustible, and when reached furnish the purest of waters. There are several distinct water-bearing strata underlying large areas of the State at

different depths, varying with the geological formation, as in the alluvium, in the drift and in the quaternary deposits. Much scattered information concerning these subterranean reservoirs has already been obtained through the results of borings in prospecting for coal, oil, salt, natural gas, etc., and in the sinking of wells, shafts and mines.

The STATE BOARD OF HEALTH desires to collect this information, and to utilize the data thus obtained, in compiling a report and constructing a chart showing the depth from the surface, of the different water-bearing strata in every part of the State where they exist, describing the character of the water of each stratum, its pressure, etc.

Such a report and chart would have great value for towns and villages, for farmers, stock raisers, manufacturers and others, in indicating where to bore for water, the necessary depth, the quality and quantity which may be found, etc. It would also indicate localities where existing supplies might be improved by sinking wells to a lower stratum. In some places it might show that the underground supply is, practically, inaccessible; in others, that the quality is not suitable for a given purpose, as where it is heavily sulphuretted or strongly saline or alkaline. In such cases it would, at least, save useless expense.

In order to make the information thus obtained available, the BOARD has secured the services of Dr. Theo. B. Comstock, of the State University, a competent geologist, who has already given much practical attention to these matters in Illinois, and in several other states.

In the absence of adequate State appropriations for such work, the BOARD is obliged to rely greatly upon the people of the State to assist in the collection of these data relating to borings, and for such other facts as may be useful in determining the character of rock formations in various localities.

The enclosed blank, prepared by Dr. Comstock, is sent you with the request that you will record upon it such information as you may be able to give regarding wells, borings, and similar excavations in your neighborhood, as well as details of your own experience in relation to topography, natural drainage, water-supply, and the history of your district in so far as it may bear upon these points.

Very respectfully,

JOHN H. RAUCH, *Secretary.*

Report No......

Character.....

INSTRUCTIONS.

Fill out the numbered blank spaces below as follows: 1, Well, boring or shaft; 2, name of town; 3, name of county; 4, name of owner of property, and location; 5, measurements; 6, purpose, as for water, coal, natural gas, etc.; 7, name of contractor, and month and year of work; 8, facts of interest in prosecution of the work. (If this space is not sufficient continue back of the blank.) 9, name of strata in the order as met, with thickness of each in feet and inches.

Medical Practice Act:

There were issued during the quarter 138 certificates authorizing the practice of medicine in the State—126 of which were to graduates upon diplomas from medical colleges in good standing; 11 to non-graduates upon proof of ten or more years of practice in the State prior to July 1, 1877, and 1 upon satisfactory examination; 6 duplicates were also issued upon proof of the destruction of the originals. Certificates were issued to 26 midwives—15 upon diplomas or licenses, and 11 upon examination.

Of the 149 applications for medical-practice certificates, 11 were refused to applicants who were unable to comply with the provisions of the law, and the requirements of the BOARD based thereon. There were also 8 applicants who presented diplomas from colleges which do not fully comply with the prescribed standard of study and instruction. Certificates were issued to these only after passing examinations in the neglected branches, or furnishing evidence of the necessary proficiency in the omitted qualifications. Two applications have been received for itinerant license, one from Michigan and one from Indiana; in accordance with the action of the BOARD heretofore, these were refused. Since July 1, 1887, \$9,700 have been refused by the BOARD for licenses of this character.

Medical Education:

More interest is now evinced in the subject of medical education than ever before. This is true of the country generally, and during the quarter, communications have been received from both extremes of the continent showing the progress being made. The Secretary of the Maryland State Board of Health announces the enactment by the Maryland legislature of a medical practice act similar to that of Illinois. The Secretary of the California State Board of Medical Examiners gives notice that after the 1st of April, 1891, no diploma issued thereafter will be recognized as the basis of a certificate entitling to practice, unless the college shall have exacted three full years of study, and attendance upon not less than three full regular courses of lectures, delivered during three separate years, as conditions of graduation. The St. Louis Medical College, whose course of instruction heretofore has been thorough, has decided to lengthen

its lecture term to six months. The Medical Department of the University of Wooster, at Cleveland, Ohio, and the Medical College of Ohio, at Cincinnati, will, at the next session, require attendance upon a three-years' graded course of lectures. The Chicago Medical College announces the extension of its lecture term to eight months.

Many applications have been received from various parts of the United States, Canada and Europe, for the BOARD'S Report on Medical Education, which continues to increase in importance and influence with the increasing interest in the subject. More than the usual number of inquiries have been received with regard to the standing of medical colleges, and for copies of our law, from every part of this country, and three inquiries have come from foreign countries.

Vital Statistics:

For the first time since the collection of vital statistics was begun all the counties have made returns of births and deaths. These, which are for the year 1887, show a general improvement and increased fullness. A total of 32,164 deaths and a total of 62,337 births are reported for the whole State, being an increase of 2,762 death returns and 3,114 birth returns, as compared with the returns of the previous year.

While there is noted this general improvement, a few counties still show a laxity of interest and consequent comparative imperfection of returns.

Respectfully submitted,

JOHN H. RAUCH, *Secretary*.

On motion of Dr. Mackenzie, at the close of the Secretary's report, the following resolution was adopted:

Resolved, That the report of the Secretary be received and printed in the report of the proceedings of this meeting; its recommendations with reference to the school vaccination order, to the prosecution of the house-to-house inspections and general sanitary work, and to the investigation of the water supplies of the State, are hereby approved, and the Secretary is authorized to carry them into effect.

The Secretary was instructed to transmit a message of sympathy to the widow of Dr. Agnew and to prepare an expression of the sentiments of the BOARD upon the death of that distinguished physician, sanitarian and medical teacher.

The application of a school of midwifery, requesting that its diplomas be accepted as the basis for the issue of certificates in lieu of the examinations by the BOARD now required of midwives, was discussed; but definite action was postponed in order to give the applicants an opportunity to present further argument in support of their petition.

The annual examination of candidates for certificates of the second class—i. e. those not graduates of medical colleges in good standing, nor entitled to certificates by reason of ten years' practice in the State prior to July 1, 1877,—was begun at 10 o'clock, A. M., and continued through the day and evening. A class of 12 applicants presented themselves for these examinations.

FRIDAY, APRIL 20.—The BOARD met at 10 o'clock A. M.; present, Newton Bateman, A. L. Clark, W. R. Mackenzie, H. V. Ferrell, John H. Rauch.

A number of cases under the medical practice act were presented to the BOARD by the Secretary. In a number of minor cases which had been disposed of under the established rules and precedents, the action of the Secretary was confirmed and approved. Sundry cases involving the revocation or issue of certificates were considered but no final action taken.

In accordance with the instruction of the BOARD during its Thursday session the Secretary presented the following tribute to the memory of Dr. Agnew. In offering the preamble and resolution, the Secretary spoke of his personal relations with the deceased and of the cordial support and ready interest Dr. Agnew had always given to the efforts of the BOARD for the elevation of the status of the medical profession and the promotion of practical sanitary measures.

IN MEMORIAM.

WHEREAS, The STATE BOARD OF HEALTH OF ILLINOIS has learned of the death of one of its most valued correspondents, Dr. Cornelius Rea Agnew, of New York City, in the very prime and fullness of his professional activity and usefulness—holding a foremost place in the medical profession, not only of his native city but of the nation; distinguished in the specialty which he has enriched by numerous contributions from the ample stores of his skill and experience and by the founding of the Brooklyn and the Manhattan Eye and Ear Hospitals, which remain as enduring monuments

not less to his technical knowledge of the hygienic requirements of hospital construction than to his active benevolence and professional spirit; an accomplished sanitarian to whose zeal, ability and influence the success and utility of the United States Sanitary Commission during the war of the rebellion was largely due, and who continued his practical interest in all measures for the protection of the health and welfare of the people throughout his life; at the time of his death President of the Board of Trustees of the College of Physicians and Surgeons of the city of New York, his alma mater, of whose faculty he has been an honored member for twenty years, in both of which positions he has been an earnest promotor of the cause of higher medical education and the ennobling of the medical profession; a man of many virtues, of spotless private character, and a Christian gentleman; therefore be it

Resolved, That in the death of Dr. Agnew this BOARD has lost an earnest friend and well-wisher, sanitary science a practical and successful exponent, the cause of higher medical education a powerful advocate and the medical profession one of its most distinguished and useful members.

On motion of Newton Bateman, the preamble and resolution were adopted, ordered spread upon the book of the minutes of the BOARD, and the Secretary was instructed to acquaint the family of Dr. Agnew, the faculty of the College of Physicians and Surgeons, New York, and the medical press of Chicago and New York city with its action.

On motion of Dr. Ferrell, the Secretary was authorized to call a meeting of health authorities of cities, towns and villages of the State, to be held at Springfield at an early date, for the purpose of promoting the work of local sanitation.

The remainder of the session was occupied in the investigation of the status of a medical college; the examinations were concluded, five candidates passing; the usual routine business transacted, and the auditing committee reported the examination and approval of the accounts of the previous quarter, amounting to \$2,674.83.

of the quarter is poorly calculated to withstand the invasion of an epidemic disease, should the contagion of such disease be allowed to effect a lodgment.

Scarlet fever has been reported at Reddick, Nokomis, Nauvoo, Normal, DeLand, Philo, Nebo, Niantic, Bardolph, Collinsville, Hoopeston, Pana and Springfield. Diphtheria at Ottawa, Quincy, Baileyville, Mt. Morris, Hillsboro, Aviston, Franklin Grove, Hoopeston, Fairmount, Plainview, Collinsville, Vandalia, Chicago and Harrisburg. Measles at Creel's Springs, Paris, Chester, Adrian, Litchfield and Ferris; pulmonary complications are the sequelæ in many instances, unusually severe, and during the coldest periods there were a number of fatal cases—in one locality, in Williamson county, out of a population of between four and five hundred, there were some twenty deaths from this, usually non-fatal disease. Typhoid (enteric) fever was also reported at St. Jacobs.

Small-pox:

Only two new cases of small-pox occurred during the quarter; one of these was in the Chicago bridewell, the inmates of which were at once vaccinated, and no other case resulted. The other occurred at Alton—disease probably contracted either in Kansas or St. Louis—symptoms so obscure that the attending physician (Dr. Haskell, President of the BOARD), requested me to assist in forming a diagnosis. Even on the fourth day a positive diagnosis was not warranted, but the case was treated as suspected from the beginning, the usual precautions were observed, and no other case followed.

The outbreak at Clinton, reported in the last quarterly, was suppressed without any spread beyond the immediate family, and no other case resulted from the case of varioloid at Decatur.

Since the close of the quarter a case has been introduced into Bond county, near Greenville, which has caused much uneasiness. The disease was contracted in Kansas, from a man just returned from Los Angeles, Cal.; in the house where he stopped was a young lady teacher, who was vaccinated with the other inmates of the house, and on being taken ill started for her home in Illinois. She was then in the febrile stage, and arrived at Greenville, April 1, in the eruptive stage, and on the following day, when Dr. Allen, the physician, was called he found the

vaccinia and the variolous disease progressing together. An unknown number of persons must have been exposed to the contagion during her railroad travel and her stay in St. Louis, as well as after her arrival in Greenville. On learning the facts I telegraphed an order for a supply of vaccine to Greenville from Chicago, and visited the locality in person on the 4th inst. The precautions set forth in the preventable disease circular of the BOARD were thoroughly enforced by the local authorities, and no other case has yet developed in the locality.*

The widespread prevalence of this disease, at the present time, both in this country and abroad, and the continued arrival of unprotected immigrants—frequently with the disease existing among them—should admonish the community of the imminent danger of another epidemic similar to that of 1881-83. The lesson of that experience—with its awful aggregate of 2,932 lives sacrificed and its tale of suffering and permanent disability of survivors; its total cost of \$4,403,968.43; its quarantines and other interruptions of business and personal intercourse—has largely faded out of the public mind. Many localities do, it is true, still enforce the vaccination of school children, and may be regarded as fairly well protected against the contingency of a small-pox epidemic. But there are many more in which this precaution has been suffered to lapse, and there is now an accumulation of unprotected individuals sufficient to furnish the material for a serious epidemic, and there is always in every community an indeterminate number whose susceptibility to the small-pox contagion can be destroyed only by repeated and frequent vaccination.

The conditions which threaten, render it imperative that the public should be again informed of the substantial security from small-pox which efficient vaccination affords; and the time is now opportune for a general enforcement of the school vaccination order of the BOARD. Since the publication of the recent report of the BOARD on this subject I am in receipt of numerous letters from school officials, health officers and parents asking that the BOARD again exert its influence to secure a wholesale vaccination of the State such as resulted so successfully in arresting the ravages of the last small-pox epidemic.

* During the session of the BOARD, information was received of the importation of another case into the State. The disease was contracted in Colorado, and developed after the return of the patient to her home in Reno, Bond county.

It is entirely possible to make Illinois small-pox proof in a fortnight. But to do this requires that the individual citizen, as well as the school authority and health officer, do his part in the work. It is the duty of every householder to see to the vaccinal protection of himself and of every inmate of his household.

As a powerful method of arousing interest in this matter there can be nothing better than the enforcement of the school-vaccination order, and I have to suggest that the necessary action to this end be had during the present meeting of the BOARD, so that advantage may be taken of the favorable season of the year for performing the operation.

Water Supplies:

Considerable preliminary work has been done toward the investigation of the water supplies of the State, in connection with the Sanitary Survey, although owing to the pressure of other duties I have not been able to make the personal visits, which I find will be necessary, to the various localities in order to secure the proper collection of the samples for the chemical and biological examinations.

In furtherance of the project for collecting and utilizing the data concerning the borings, shafts and wells sunk in various parts of the State, the following circular has been prepared.

ILLINOIS STATE BOARD OF HEALTH.

OFFICE OF THE SECRETARY.

MY DEAR SIR:

As is well known, the dry summer weather of the last two years was productive not only of much sickness, but of great, and in some cases disastrous, losses to the farmer and stock breeder, to railroads and to manufacturing industries. The rainfall—lighter than for many years—was not sufficient to keep ponds, springs, wells and water-courses pure and wholesome, and in many places they dried up entirely.

Although the drouths during these two seasons were more general and more protracted than any which have occurred since the Signal Service began its observations in this State, an examination of these observations shows that dry seasons of an extent sufficient to cause much distress are not uncommon. Anything which may be done to remedy this condition and to guard against its evil results would, therefore, be a public benefit.

There is good reason to believe that the much greater development of our underground water-supplies is entirely feasible. These are, practically, inexhaustible, and when reached furnish the purest of waters. There are several distinct water-bearing strata underlying large areas of the State at

different depths, varying with the geological formation, as in the alluvium, in the drift and in the quaternary deposits. Much scattered information concerning these subterranean reservoirs has already been obtained through the results of borings in prospecting for coal, oil, salt, natural gas, etc., and in the sinking of wells, shafts and mines.

The STATE BOARD OF HEALTH desires to collect this information, and to utilize the data thus obtained, in compiling a report and constructing a chart showing the depth from the surface, of the different water-bearing strata in every part of the State where they exist, describing the character of the water of each stratum, its pressure, etc.

Such a report and chart would have great value for towns and villages, for farmers, stock raisers, manufacturers and others, in indicating where to bore for water, the necessary depth, the quality and quantity which may be found, etc. It would also indicate localities where existing supplies might be improved by sinking wells to a lower stratum. In some places it might show that the underground supply is, practically, inaccessible; in others, that the quality is not suitable for a given purpose, as where it is heavily sulphuretted or strongly saline or alkaline. In such cases it would, at least, save useless expense.

In order to make the information thus obtained available, the BOARD has secured the services of Dr. Theo. B. Comstock, of the State University, a competent geologist, who has already given much practical attention to these matters in Illinois, and in several other states.

In the absence of adequate State appropriations for such work, the BOARD is obliged to rely greatly upon the people of the State to assist in the collection of these data relating to borings, and for such other facts as may be useful in determining the character of rock formations in various localities.

The enclosed blank, prepared by Dr. Comstock, is sent you with the request that you will record upon it such information as you may be able to give regarding wells, borings, and similar excavations in your neighborhood, as well as details of your own experience in relation to topography, natural drainage, water-supply, and the history of your district in so far as it may bear upon these points.

Very respectfully,

JOHN H. RAUCH, *Secretary.*

Fill out the numbered blank spaces below as follows: 1, Well, boring or shaft; 2, name of town; 3, name of county; 4, name of owner of property, and location; 5, measurements; 6, purpose, as for water, coal, natural gas, etc.; 7, name of contractor, and month and year of work; 8, facts of interest in prosecution of the work. (If this space is not sufficient continue on back of the blank.) 9, name of strata in the order as met, with thickness of each in feet and inches.

Medical Practice Act:

There were issued during the quarter 138 certificates authorizing the practice of medicine in the State—126 of which were to graduates upon diplomas from medical colleges in good standing; 11 to non-graduates upon proof of ten or more years of practice in the State prior to July 1, 1877, and 1 upon satisfactory examination; 6 duplicates were also issued upon proof of the destruction of the originals. Certificates were issued to 26 midwives—15 upon diplomas or licenses, and 11 upon examination.

Of the 149 applications for medical-practice certificates, 11 were refused to applicants who were unable to comply with the provisions of the law, and the requirements of the BOARD based thereon. There were also 8 applicants who presented diplomas from colleges which do not fully comply with the prescribed standard of study and instruction. Certificates were issued to these only after passing examinations in the neglected branches, or furnishing evidence of the necessary proficiency in the omitted qualifications. Two applications have been received for itinerant license, one from Michigan and one from Indiana; in accordance with the action of the BOARD heretofore, these were refused. Since July 1, 1887, \$9,700 have been refused by the BOARD for licenses of this character.

Medical Education:

More interest is now evinced in the subject of medical education than ever before. This is true of the country generally, and during the quarter, communications have been received from both extremes of the continent showing the progress being made. The Secretary of the Maryland State Board of Health announces the enactment by the Maryland legislature of a medical practice act similar to that of Illinois. The Secretary of the California State Board of Medical Examiners gives notice that after the 1st of April, 1891, no diploma issued thereafter will be recognized as the basis of a certificate entitling to practice, unless the college shall have exacted three full years of study, and attendance upon not less than three full regular courses of lectures, delivered during three separate years, as conditions of graduation. The St. Louis Medical College, whose course of instruction heretofore has been thorough, has decided to lengthen

its lecture term to six months. The Medical Department of the University of Wooster, at Cleveland, Ohio, and the Medical College of Ohio, at Cincinnati, will, at the next session, require attendance upon a three-years' graded course of lectures. The Chicago Medical College announces the extension of its lecture term to eight months.

Many applications have been received from various parts of the United States, Canada and Europe, for the BOARD'S Report on Medical Education, which continues to increase in importance and influence with the increasing interest in the subject. More than the usual number of inquiries have been received with regard to the standing of medical colleges, and for copies of our law, from every part of this country, and three inquiries have come from foreign countries.

Vital Statistics:

For the first time since the collection of vital statistics was begun all the counties have made returns of births and deaths. These, which are for the year 1887, show a general improvement and increased fullness. A total of 32,164 deaths and a total of 62,337 births are reported for the whole State, being an increase of 2,762 death returns and 3,114 birth returns, as compared with the returns of the previous year.

While there is noted this general improvement, a few counties still show a laxity of interest and consequent comparative imperfection of returns.

Respectfully submitted,

JOHN H. RAUCH, *Secretary*.

On motion of Dr. Mackenzie, at the close of the Secretary's report, the following resolution was adopted:

Resolved, That the report of the Secretary be received and printed in the report of the proceedings of this meeting; its recommendations with reference to the school vaccination order, to the prosecution of the house-to-house inspections and general sanitary work, and to the investigation of the water supplies of the State, are hereby approved, and the Secretary is authorized to carry them into effect.

The Secretary was instructed to transmit a message of sympathy to the widow of Dr. Agnew and to prepare an expression of the sentiments of the BOARD upon the death of that distinguished physician, sanitarian and medical teacher.

The application of a school of midwifery, requesting that its diplomas be accepted as the basis for the issue of certificates in lieu of the examinations by the BOARD now required of midwives, was discussed; but definite action was postponed in order to give the applicants an opportunity to present further argument in support of their petition.

The annual examination of candidates for certificates of the second class—i. e. those not graduates of medical colleges in good standing, nor entitled to certificates by reason of ten years' practice in the State prior to July 1, 1877,—was begun at 10 o'clock, A. M., and continued through the day and evening. A class of 12 applicants presented themselves for these examinations.

FRIDAY, APRIL 20.—The BOARD met at 10 o'clock A. M.; present, Newton Bateman, A. L. Clark, W. R. Mackenzie, H. V. Ferrell, John H. Rauch.

A number of cases under the medical practice act were presented to the BOARD by the Secretary. In a number of minor cases which had been disposed of under the established rules and precedents, the action of the Secretary was confirmed and approved. Sundry cases involving the revocation or issue of certificates were considered but no final action taken.

In accordance with the instruction of the BOARD during its Thursday session the Secretary presented the following tribute to the memory of Dr. Agnew. In offering the preamble and resolution, the Secretary spoke of his personal relations with the deceased and of the cordial support and ready interest Dr. Agnew had always given to the efforts of the BOARD for the elevation of the status of the medical profession and the promotion of practical sanitary measures.

IN MEMORIAM.

WHEREAS, The STATE BOARD OF HEALTH OF ILLINOIS has learned of the death of one of its most valued correspondents, Dr. Cornelius Rea Agnew, of New York City, in the very prime and fullness of his professional activity and usefulness—holding a foremost place in the medical profession, not only of his native city but of the nation; distinguished in the specialty which he has enriched by numerous contributions from the ample stores of his skill and experience and by the founding of the Brooklyn and the Manhattan Eye and Ear Hospitals, which remain as enduring monuments

not less to his technical knowledge of the hygienic requirements of hospital construction than to his active benevolence and professional spirit; an accomplished sanitarian to whose zeal, ability and influence the success and utility of the United States Sanitary Commission during the war of the rebellion was largely due, and who continued his practical interest in all measures for the protection of the health and welfare of the people throughout his life; at the time of his death President of the Board of Trustees of the College of Physicians and Surgeons of the city of New York, his alma mater, of whose faculty he has been an honored member for twenty years, in both of which positions he has been an earnest promotor of the cause of higher medical education and the ennobling of the medical profession; a man of many virtues, of spotless private character, and a Christian gentleman; therefore be it

Resolved, That in the death of Dr. Agnew this BOARD has lost an earnest friend and well-wisher, sanitary science a practical and successful exponent, the cause of higher medical education a powerful advocate and the medical profession one of its most distinguished and useful members.

On motion of Newton Bateman, the preamble and resolution were adopted, ordered spread upon the book of the minutes of the BOARD, and the Secretary was instructed to acquaint the family of Dr. Agnew, the faculty of the College of Physicians and Surgeons, New York, and the medical press of Chicago and New York city with its action.

On motion of Dr. Ferrell, the Secretary was authorized to call a meeting of health authorities of cities, towns and villages of the State, to be held at Springfield at an early date, for the purpose of promoting the work of local sanitation.

The remainder of the session was occupied in the investigation of the status of a medical college; the examinations were concluded, five candidates passing; the usual routine business transacted, and the auditing committee reported the examination and approval of the accounts of the previous quarter, amounting to \$2,674.83.

QUARTERLY MEETING, CHICAGO, JUNE 28-29, 1888.

The ILLINOIS STATE BOARD OF HEALTH convened in quarterly session at the Grand Pacific hotel on Thursday, June 28, at 10 A. M.

Present: A. L. Clark, Newton Bateman, W. R. Mackenzie and John H. Rauch.

In the absence of the President, Dr. Newton Bateman presided.

The minutes of the last regular meeting (April, 1888) were read and approved.

The regular order of business was suspended and the reading of the Secretary's quarterly report was deferred until the following day.

The Secretary presented the accounts for the quarter, which, on motion, were referred to the Auditing Committee.

In the absence of Dr. Ferrell, Dr. Clark was appointed a member of the Auditing Committee.

In the matter of certain applications for certificates under the Medical Practice Act, the time was extended for parties to make reply to charges filed against them.

The recognition of the diplomas of a certain college of midwifery as the basis for the issue of certificates of that character was next considered, representatives of said college appearing before the BOARD in its behalf. After due consideration it was ordered that all graduates of said school must pass the examination of the BOARD before being authorized to practice.

The rest of the morning session was devoted to the transaction of routine business, and at 12 o'clock the BOARD adjourned until 2 o'clock P. M.

At the afternoon session representatives of two medical colleges, against which charges had been filed, appeared before the

BOARD, and submitted arguments to show that their institutions should be considered in "good standing" by the BOARD. In both cases the matter was taken under advisement.

Consideration of cases under the Medical Practice Act occupied the attention of the BOARD during the remainder of the first day's session, and at 6 o'clock P. M., the BOARD adjourned until Friday at 10 A. M.

FRIDAY, JUNE 29.—Pursuant to adjournment from the previous day the BOARD resumed its session at 10 o'clock A. M.

Present: Dr. Haskell, President, in the chair, and Drs. Clark, Ludlam, Mackenzie and Rauch.

Under the regular order of business, was presented the

QUARTERLY REPORT OF THE SECRETARY.

Although there have been 9 importations of small-pox into the State during the year, and the disease is prevalent in many surrounding localities, and especially among the negroes along the Mississippi and Ohio rivers, there has been no spread of the contagion in Illinois, and the outbreaks thus far have been promptly suppressed with only one exception. The two cases in Bond county, at Greenville and at Reno—existing at the date of the last report in April—caused no others in the neighborhood, and up to the latter part of May, the State was free from the disease.

May 26th, three cases were reported at Metropolis, in Massac county, among some negroes. The contagion was introduced by a steamboat from Paducah, Kentucky. The health officer of the town contracted the disease, but aside from this there was no other case outside the family first infected.

At East St. Louis, on the evening of June 4th, I learned that there had been one case in that city ten days previous, but as the patient was at once removed to the St. Louis quarantine station, the occurrence was not reported. On inquiring as to the precautions taken, I expressed apprehension that other cases might yet result, and immediately telegraphed for a supply of vaccine virus, which was received on the 7th, and a general and systematic vaccination and re-vaccination were begun. It was too late, however, to prevent the development of three more cases within 48 hours after I first learned of the facts, and these

cases were followed by two additional ones, all in the same house. On the 23d I received notice of another case and an application for an additional supply of virus, to which I replied by advising the use of the humanized lymph, which by this time was in abundant supply, as the result of over 2,000 vaccinations made on and after the 7th inst.

The authorities did good and effective work; the Board of Education was especially thorough—ordering and enforcing a general vaccination in all the schools.

On the 9th of June Dr. Mackenzie telegraphed me from Chester, saying—

“Steamer Providence landed a negro at Kaskaskia who has variola.”

To which I replied—

“County authorities must take care of case. The boat or marine hospital service must pay expenses. See that the rules of the BOARD are enforced.”

It was subsequently learned that the steamer City of Providence, of the St. Louis and New Orleans Anchor Line, on her way to St. Louis had landed a negro suffering with small-pox at Kaskaskia, on the 5th of June, about 200 yards below the landing of J. G. Burch. He was discovered by Mr. Burch, who provided for him and procured medical attendance. Dr. Mackenzie was notified at Chester, and after telegraphic correspondence with this office, immediately repaired to Kaskaskia and gave instructions for the patient's care. A temporary hospital was erected and the services of a good nurse secured. He was attended by Dr. Boldt, of Kaskaskia, and everything possible done for him; but he continued to grow worse, and died on the 17th of June. Vaccination and re-vaccination were carried on, and every effort made to prevent the spread of the disease. No other cases have resulted. I wrote the president of the steamboat company on June 13, calling his attention to the landing of said negro, and expressing surprise that anyone should be guilty of such inhumanity, at the same time endangering the lives of others, and informed him that the company would be held responsible for the expense incident to the negro's care. To this he replied, stating that the negro was a tramp, and not known

to be sick when landed. I sent this letter to Dr. Mackenzie, and after investigation he returned it with affidavits from Dr. Boldt and Mr. Burch, of Kaskaskia, showing conclusively that the negro was sick with small-pox when landed. I so informed the steamboat company, and stated that the least the company could do in repairing the wrong was to pay the expenses in connection with the case. Within a few days itemized statements of expenses incurred have been received, and will be submitted to the steamboat company for payment.

In the early part of the quarter there were localized outbreaks of scarlet fever at Nokomis, Earlville, Nashville, Biggs-ville, Foreston and Kinderhook; of German measles at Plainfield and Kinderhook; of diphtheria at Earlville; and of typhoid fever at Mt. Pulaski and Springfield. I have been much chagrined at this latter occurrence, and will make it the subject of a detailed report to the BOARD at a later date, when the investigations now being made—and including chemical and biological examinations of the water supply—shall have been completed. The outbreak occurred among the students of Concordia College—some of whom had nursed a little negro waif, sick with the disease. It resulted in 45 cases and 9 deaths; the session was interrupted; the classes broken up, and the institution will not be again opened until the premises are put in good sanitary condition.

General Sanitary Work :

Aside from the foregoing, the general health of the State has been very satisfactory. A good amount of sanitary work has been accomplished, a number of cities and towns having completed their re-inspections and others having begun this work for the first time. Galesburg, Cairo and Sparta are to be specially commended for the thoroughness of their work in this connection.

The circular of the BOARD addressed to railway managers in April last, has met with a very gratifying reception. Many roads have entirely reformed the sanitary conditions with respect to the accommodations for passengers at stations; vaults have been emptied, disinfected and the contents disposed of so as to avoid future nuisance; and arrangements are now secured

for keeping these appurtenances in a cleanly and comfortable condition. Much attention has also been given to the purity of the drinking water furnished at the stations and on the trains.

Work on the investigation of the water supplies of the State has been impeded to some extent by the high stage of water in many of the streams, and lately by the excessive rainfall over large areas. Considerable progress, however, has been made. Time tables for the collection of water supplies at various points—23 in number—between Chicago and Alton have been constructed, so as to make it practicable to follow the changes, by pollution and purification, in a given body of water from the time it leaves Lake Michigan until it flows past the city of Alton. Reports of the chemical and biological examinations are received in the Secretary's office.

Except with the interruptions noted, samples of water are now collected and examined once a week at Chicago (lake water), Bridgeport, Lockport, Joliet (above and below city), Morris, LaSalle, Henry, Peoria, Pekin, Copperas Creek Dam, Havana, Beardstown, Pearl and Grafton, on the main stream; and from the Kankakee, DuPage, Fox, Big Vermilion and Little Vermilion, Sangamon and Spoon tributaries. Samples will also be taken from Alton and East St. Louis (Mississippi river water), and from other points as found necessary in the course of the work, which will continue six months or more.

In each sample the following determinations are made: Total solids, suspended matter, nitrates and nitrites, chlorine, hardness, free ammonia, albuminoid ammonia, oxygen consumption, and color and odor. By continuing the work through so long a period, and by making the analyses as fully as outlined, it is hoped that the effect of accidental variations will be practically eliminated. The amount of flow from some of the tributaries is pretty well known, and before the end of the summer it will be known for all, so that we will then be in possession of data complete enough to enable us to give a fair answer to the question, what is the rate of oxidation in the Illinois river in a flow of 400 miles, with sources and amount of contamination, and amount of dilution from tributaries, practically known.

The results obtained thus far in this investigation show the importance of a study of the tributaries. The waters of some of these appear to contain a great deal of decaying vegetable

matter. The character of these waters will be thoroughly studied, as an understanding of them is of the highest importance to the sanitary welfare of the communities supplied from such sources. The public water supplies of some of the cities and towns are also being investigated.

The investigation of the underground water supplies is making satisfactory progress—records from some 60 different localities, in all parts of the State, having been already secured.

Conference of State Boards of Health:

In conformity with the instructions of the BOARD, I attended the session of the National Conference of State Boards of Health in Cincinnati, May 4th, ult. The proceedings of this meeting have been published, and it is only necessary in this connection to refer to so much as is of especial interest to Illinois. A committee was established to visit or correspond with the State, provincial and other authorities having charge of the sea-board quarantines against dangerous infectious diseases, for the purpose of learning the methods in use, and the amount of co-operation such authorities can and will give for the protection of the people of this continent against said diseases. The committee is also authorized to act for the Conference for this purpose and is instructed to report the results of its investigation to the Conference and to the State Boards of Health, and to arrange for proper co-operation should any foreign epidemic disease threaten to invade or actually get a foot-hold on this continent.

The members of this committee were elected by ballot, and are as follows:

Dr. J. H. Rauch, Illinois, chairman; Dr. H. B. Baker, Michigan; Dr. C. N. Hewitt, Minnesota; Dr. J. N. McCormack, Kentucky; Dr. T. G. Simons, South Carolina; Dr. James Simpson, California; Dr. John D. Jones, Ohio; Dr. P. H. Bryce, Province of Ontario, Canada, and Dr. Benjamine Lee, of Pennsylvania. Sub-committees were subsequently appointed to visit personally, where necessary, all the quarantine stations on the Atlantic and Pacific coasts, from the St. Lawrence to the Rio Grande, and from Oregon to Lower California; these sub-committees to secure the co-operation of the States should cholera or any other epidemic disease obtain a foothold.

The chairman of the general committee is a member *ex-officio* of each of these sub-committees, and was requested by the members to formulate instructions as to the lines on which the investigations of the various quarantine establishments should be conducted. This I have already done, and in order to cover the ground more completely I have also secured the appointment of Drs. F. A. Gerrish, of Portland, Me.; C. A. Lindsley, of New Haven, Conn.; H. S. Orme, of Los Angeles, Cal., and J. N. Evans, of South Carolina, to the committee.

National Quarantine:

Regulations approved by the President of the United States, and promulgated by the Secretary of State to United States consular officers, have been re-published for the information of United States quarantine, State and municipal health officers. These are based upon section 2 of the act of 1878, which provides that whenever any infectious or contagious disease shall appear in any foreign port or country, and whenever any vessel shall leave any infected foreign port, or, having on board goods or passengers coming from any place or district infected with cholera or yellow fever, shall leave any foreign port bound for any port in the United States, the consular officer, or other representative of the United States, at or nearest such foreign port, shall immediately give information thereof through the Department of State, and shall report the name, the date of departure, and the port of destination in the United States; the object being to secure timely advice of the outbreaks of cholera and yellow fever, and of the probable transportation of the poisons of these preventable diseases in vessels bound for this country.

The Marine Hospital Service, through the Treasury Department, has also secured instructions to the Revenue Marine Service to co-operate in the prevention of the introduction of any foreign pestilence as far as practicable.

I take pleasure in saying that the maritime quarantine service is better administered at this time than ever before.

Thus far, although Asiatic cholera still exists in South America, there has been no intimation of its reappearance in any of

the districts of Europe which were infected last year, nor of its development in any of the countries which were then threatened.*

Conference of Local Health Authorities :

The conference of health authorities of cities, towns and villages of the State, for the purpose of promoting the work of local sanitation—and which was authorized at the April quarterly meeting—was held at the State capitol on May 17–18. There were present: Dr. J. R. Corbus, health officer of LaSalle; Dr. O. C. DeWolf, commissioner of health, and W. H. Genung, chief inspector, Chicago; Milton Billings, trustee, Cerro Gordo; L. B. Scharringhausen, trustee, Desplaines; Dr. L. H. Cohen, sanitary inspector, Quincy; Dr. J. B. Shawgo, health officer, Quincy; Dr. W. F. Bayne, board of health, McComb; Dr. A. L. Clark, state board of health, Elgin; J. D. Paige, mayor, and S. Lagger, alderman, Joliet; Dr. W. B. Helm, health officer, Rockford; Dr. B. T. Buckley, chairman board of health, Freeport; A. Chapman, city attorney, Winchester; Dr. L. L. Leeds, health officer, Lincoln; Dr. Katherine Miller, Lincoln; P. A. Armstrong, president board of health, Morris; F. A. Gregory, chairman health committee, Bloomington; Dr. R. B. Dyer, health officer, Ottawa; Dr. M. H. Goodrick, health officer, Jacksonville; J. E. Wharff, mayor, and Dr. E. Rowland, health officer, Olney; Dr. G. W. Foote, health commissioner, Galesburg; Dr. W. S. Holliday, health officer, Monmouth; Dr. G. A. Wells, health officer, Galva; Dr. G. H. Hunt, secretary board of health, Paris; Dr. S. P. Ayer, Kewanee; Dr. J. M. Cowen, Hennepin; Dr. J. D. Whitley, president, board of health, Petersburg; Geo. C. Wilkinson, president village board, Edinburg; Dr. J. L. Wiggins, health officer, East St. Louis; Dr. C. Armstrong, mayor, and Edward Miner, city clerk, Carrollton; J. F. Huston, mayor, Virden; J. C. Perkins, mayor, Sparta; Dr. R. E. Starkweather, Prof. J. H. Long, chemist, and Dr. Lester Curtis, biologist, Chicago; Drs. G. N. Kreider and A. L. Converse, Springfield; Dr. F. A. Seiber, health commissioner, Lake View; Dr. A. J. Perkins, Plainville; F. Epler, alderman, and Charles Goodwin, chairman board of health, Beardstown.

* Subsequent to the date of the meeting, two deaths from cholera were reported at Messina, Italy.

The meeting was called to order by the Secretary of the BOARD, and organized by electing Dr. Corbus and Dr. Hunt chairman and secretary, respectively. Dr. DeWolf made an address upon the "Disposal of Garbage;" Mr. Genung upon the "Plumbing and Drainage of Houses;" Profs. Long and Curtis upon "Water-Supply Pollution;" Dr. Buckley read a paper on the "Disposal of Nightsoil;" and Dr. Cohen upon the "Methods of Prevention and Suppression of Epidemics of the Contagious and Infectious Diseases." The papers and addresses were eminently practical, and the discussions which followed were spirited and interesting and participated in by most of those in attendance.

The Secretary introduced the last topic--the "Registration of Vital Statistics"--with a recital of the attempts of the STATE BOARD to secure better legislation on the subject. It was shown that too much is asked of the physician under the present system. Every town of 1,000 population or over should be compelled to require a burial permit, and parents and other relatives or friends should be made equally responsible with the doctor. County clerks, in many cases, take little interest in the work, and it involves great labor to keep 102 of these and 6,000 physicians throughout the State in line. Drs. Armstrong, Goodrick, Seiber, Corbus, Kreider and others participated in the discussion.

The necessity for a uniform health organization for cities and towns throughout the State drew out the following resolution from Mr. Armstrong, of Morris, which was adopted:

WHEREAS, Uniformity in the organization of the various boards of health of this State, together with having their powers and duties clearly defined by law, with the full and clearly defined means of enforcing the order of said boards, is a matter of such importance as to demand the attention of our law-makers; therefore be it

Resolved, That a committee of five be appointed to prepare a bill for an act to create boards of health in the several cities and villages of the State, defining their powers and duties and fixing their compensation, and cause the same to be presented to the next General Assembly of this State, and urge its passage either as an amendment to the present act for the incorporation of cities and villages, or as an independent law.

The following were chosen as the committee: J. B. Corbus, LaSalle, chairman; Perry A. Armstrong, Morris; B. T. Buckley, Freeport; C. Armstrong, Carrollton; E. Rowland, Olney.

Medical Education and Statistics:

In justification of the general acceptance, both in this country and abroad, of the reports of the ILLINOIS STATE BOARD OF HEALTH on the subject of medical education in the United States and Canada—and with especial reference to the accuracy of the statistics contained in those reports—it seems to be a duty to call attention to the following passages in the address of the President of the American Medical Association, delivered at the Thirty-ninth Annual Meeting, on the eighth of May last. I quote from the copy of the address published in the Journal of the Association, in its issue of May 12, 1888, pages 574-579. In the second column of page 575, Dr. Garnett says:

"That the professions of law and medicine are overcrowded in this country, no man of common observation will deny. The ratio of professional men in the United States to the population exceeds that of any other country in the civilized world, so that any legitimate means of checking this evil which can be devised and carried into practical effect, must be hailed by the medical world, as well as the general public, as an inestimable boon. The statistics recently published by the ILLINOIS STATE BOARD OF HEALTH, tending to show the annual number of graduates in medicine within the last three years, and the conclusions based upon those statistics by the medical journals of the country, I have reason to believe, are not entirely accurate. In support of this opinion, and the views expressed in the foregoing part of this address, I shall take the liberty of directing your attention to a resume of statistics bearing upon this subject, furnished me through the kindness and courtesy of Hon. N. H. R. Dawson, United States Commissioner of Education.

"These will, no doubt, exhibit in a more forcible and impressive manner to your minds the especial subject under consideration than any individual argument, however logical or conclusive, that could be presented, particularly when it is remembered that they are prepared under the immediate authority and direction of the United States Government, having at its command far greater resources than any one state or county could employ."

Then follow something more than two columns of statements, tables, deductions, etc., which it is not necessary to discuss—further than to say that they have absolutely no bearing whatever upon "the annual number of graduates in medicine within the last three years," as shown by "the statistics recently published by the ILLINOIS STATE BOARD OF HEALTH," nor upon the "conclusions based upon those statistics published by the medical journals of the country," and the accuracy of which statistics

and conclusions are thus impeached in a presidential address before the representative body of the profession directly interested.

So far as it is possible to discover in the extract from the "resume of statistics"—for it is obviously only an extract which is furnished in the address—so far as appears from this extract the figures of the commissioner of education relate to a single year, and not to "the annual number of graduates in medicine within the last three years."

This appears to be the college year 1885-86, during which the commissioner found "89 regular, 10 eclectic, 13 homeopathic and 2 physio-medical schools" in existence—in the sense of holding sessions and graduating students.

Turning to the report of this BOARD for 1885-86 (page 15) the following figures are to be found: 90 regular, 10 eclectic, 13 homeopathic, 3 physio-medical, 1 miscellaneous—a total of 117 schools in existence, or 3 more than reported by the commissioner of education. The BOARD's report, however, includes all colleges in existence in 1885-86, while the commissioner's figures are intended to include only those which had classes of graduates. The additional regular college reported by the BOARD is the Beaumont Hospital Medical College of St. Louis, Mo., which began its first session October 4, 1886,—see page 111 of the report. The additional physio-medical school is the Curtis Physio-Medical Institute, at Marion, Ind.,—concerning which the following remarks are made on page 73 of the report:

REMARKS: The above is collated from the Fifth Annual Announcement of the school. Its existence was unknown to this BOARD until after the recent law regulating the practice of medicine and surgery in the State of Indiana had been passed. Repeated letters requesting information in regard to its history, etc., have failed to elicit any reply from the faculty. Owing to this reticence on the part of those connected with the school, letters of inquiry were sent to each county in Indiana, in order to ascertain how many diplomas had been placed upon record in the offices of the circuit clerks. By this means seventeen graduates have been discovered, their diplomas being dated as follows: One March 1, 1883; one February 28, 1884; one March, 1884; eight March 4, 1885; five July 4, 1885, and one July 25, 1885.

It will be observed that until March, 1885, there had been but one graduating course, but after the law regulating the practice of medicine and surgery, passed by the legislature in April, had been declared in full force

by proclamation of the Governor, issued July 23, 1885, six additional diplomas were immediately issued. It would seem that the law had thus stimulated the making of this second crop of doctors.

Of the present faculty two are graduates of the school—one in March and one in July, 1885.

Names of matriculates and graduates not given in the announcement.

Diplomas not recognized.

The "miscellaneous" school, reported by the BOARD, is a Missouri institution, claiming to be regular, but advertising to "also teach all that is distinctive in homeopathy and the eclectic systems." Diplomas not recognized by this BOARD. See page 110 of the report.

There is the same substantial agreement between the students' and graduates' figures given by the commissioner and those by the BOARD. The former reports 11,302 students, and 3,893 graduates; the BOARD reports 11,279 matriculates, and 3,813 graduates. The commissioner finds 23 more students and 80 more graduates than the BOARD. It is sufficient to remark in this connection that the BOARD's figures do not include in the class of "matriculates" men in attendance upon the sessions of 1885-6 who had graduated in a previous year, although these figure in the college catalogue and swell the list of attending students. To include such would be to increase by so many the apparent number of new men fitting for the practice of medicine. Similarly those upon whom *ad eundem* and honorary degrees are conferred are not included in the BOARD's total of new graduates for any given year. These have already been accounted for in the totals of graduates of the several years when they were actually added to the ranks of the profession.

I have no criticism, however, to offer upon the "resume of statistics" furnished by the commissioner of education: it would be unjust to that gentleman to make any, since the sole object of his concrete numbers is, as he expressly states, "to furnish a basis upon which the percentage numbers given below may be verified." These percentages relate entirely to the proportions of schools to students and to graduates, and of graduates to students—matters having no possible connection with the determination of "the ratio of professional men in the United States to population," which is the bone of Dr. Garnett's contention. This ratio, he, Dr. Garnett, states is about 1 practitioner to

every 580 of population, a result which is arrived at by assuming that the population of the United States in the present year, 1888, is 61,420,000, and, per consequence, that the total number of physicians is 105,896. The authority for these two assumptions is not given; nor is it material, since the proportion agrees pretty closely with the exact figures furnished five years ago in the report of this BOARD on Medical Education, and in which (pp. 174-175) are given the numbers of physicians and of medical students, and the proportion of each to population in the states separately, and in the two countries, Canada and the United States.

The exact ratio at that time—the college year 1882-83—was 1 physician to every 578.5 of population. Dr. Garnett says it will now “average about 1 to every 580.” If it were worth while it might readily be shown that there is good reason for believing that the proportion of population to each physician is even greater than this. In the quarterly report of the proceedings of the Eleventh Annual Meeting of the BOARD, published January 17, 1888, there is given a pretty full abstract of the last report on Medical Education—which report has been ready for the printer for some time. I quote from this printed abstract—page 16 of the Report of Proceedings—as follows:

“The effect of this improvement in methods of instruction and of the higher qualifications demanded before graduating the student is best seen in the diminishing percentage of graduates to matriculates. The tables embraced in the reports now cover a sufficiently long period—from 1877 to 1887 inclusive, and deal with large enough numbers—116,529 matriculates and 37,493 graduates, to give them a positive value for this purpose. Errors arising from unusual or accidental conditions are largely cancelled or diminished in importance in these aggregates, and the inferences drawn may be accepted as fairly trustworthy.

—“The first act of importance which arrests the attention in this comparison is that, notwithstanding the growth of population, the total number of medical students has never yet reached the proportions attained in 1882-3. The sessions of that winter were attended by 13,088 students; of 1883-4 by 12,763 students; of 1884-5 by 11,975 students; of 1885-6 by 12,321 students, and of 1886-7 by 12,948 students. Although there was a gain last year of 627 students over the attendance in 1885-6, the aggregate in 1886-7 was still 140 less than in 1882-3.

“The effect of a higher standard of qualifications for graduation is further shown in the diminishing percentage of graduates to the total number of students. In 1882-3 out of every 1,000 matriculates 322 were

graduated, taking both the United States and Canada and all schools of practice into the account. In 1886-7, only 294 out of every 1,000 matriculates were graduated. In the United States alone in 1882-3 out of every 1,000 matriculates 331 were graduated, while in 1886-7 only 305 out of every 1,000 matriculates were graduated."

Which is to say that, while the population increases—according to the census authorities—at the rate of 2 per cent. per annum, (exclusive of the increment by immigration) the number of new graduates entering the profession was nearly 8 per cent. less in 1886-7 than it was in 1882-3. But this is only incidental to the present purpose, and I pass to another passage in Dr. Garnett's address.

From the collocation of the resume of statistics with Dr. Garnett's text the hasty reader might fairly infer that the deductions in the latter were based upon premises furnished in the former. It is possible that, through inadvertence or misadventure, some portion of the resume has been omitted in the address; for it is quite clear that Dr. Garnett's statement immediately following the resume is a *non sequitur*. The doctor, however, goes on to say—page 576 of the Journal:

"This very carefully prepared analysis of the medical schools of the United States, it will be observed, like that contained in the statistical report of the ILLINOIS STATE BOARD OF HEALTH, rests largely upon the correctness of the catalogues put forth by these schools; and, though possessing some additional sources of information, cannot be regarded as conclusively accurate for the reason, as I have elsewhere stated, that in many instances the catalogues of colleges do not correctly represent the practical operations of those institutions."

To what extent the commissioner of education relies upon the college catalogues, and what "additional sources of information"—not possessed by the ILLINOIS STATE BOARD OF HEALTH—are at his command, Dr. Garnett does not disclose. But the assumption that the trustworthiness of the statistics published by this BOARD "rests largely upon the correctness of the catalogues put forth by the schools," is entirely gratuitous, and implies a want of familiarity with the accessible facts.

In the report on Medical Education and Medical Colleges in the United States and Canada, from 1765 to 1886, published by the ILLINOIS STATE BOARD OF HEALTH in the latter year, appears the following on page 3:

"From the effort to define with more precision, and in accordance with the standard of good and well-accredited medical schools, the qualifications and conditions under which the BOARD may recognize the diplomas of any given college as in 'good standing,' a vast amount of information, historical, technical and miscellaneous, has been accumulated—mainly by correspondence, but much of it by the personal investigation and research of the Secretary. Originally intended to subserve the purpose above described, the value of this information for reference was at once obvious, and the data first obtained were tabulated and published as an appendix to the report of the Committee on Medical Education and Medical Colleges."

Following this outline of the genesis of the report in 1880, is a description of its development, from a single sheet covering all the then available data of a total of fifty-nine schools, up to the report of 1886, consisting of 172 octavo pages and embracing all the material facts relating to 252 medical institutions and their classes—aggregating 103,598 matriculates and 33,684 graduates—during the preceding nine years. On page 13 of this report it is stated that—"Prior to the sessions of 1877-78 no attempt had ever been made to collect and collate these figures and data in this manner, and it has required persistent effort to perfect them for the earlier years."

This "persistent effort" has been continued ever since, and consists, among other things, of a correspondence—involving in a single year the interchange of over 2,000 letters, the majority of which were sent to officers and members of the faculties of the various institutions, to prominent members of the profession, to health and Government officials—National, State and municipal—to librarians, journalists and others. It consists, also, of personal visit and investigation by the Secretary in many instances where conclusive and trustworthy information can not be otherwise obtained. And it is hardly necessary to say that it involves, primarily, a critical study of all accessible publications—reports, proceedings, addresses, monographs, periodicals, announcements, catalogues, prospectuses, circulars, etc.,—bearing upon the subject of medical education.

Each succeeding year's catalogues and announcements are carefully examined; where the names of matriculates are published these are compared name by name, and all duplicates are deducted from the total. It may be explained that the desire to show a large attendance, and also to reduce the apparent pro-

portion of graduates to matriculates, leads a certain class of schools to this duplication of names.

During the past week I have received the "Forty-fourth Annual Catalogue and Announcement" of one such school, in which there are 46 duplicates in a claimed total of 216 matriculates in attendance upon the sessions of 1886-87. The number of graduates was 63 and the claimed proportion of graduates to matriculates is 29 per cent. It should be 37 per cent. The year before there were 56 duplicates detected out of 217 names; total graduates 58; claimed proportion 26.7 per cent.; actual proportion 36 per cent. This year the names of matriculates are not published; but, as in all similar cases, the college will be requested not only to furnish the names in writing for the information of the BOARD, and to enable it to determine the recognition of its diplomas, but the affidavit will be exacted which the BOARD now requires of all schools concerning which there is a question as to good faith in conforming to the standard of minimum requirements, or of enforcing their own published regulations, or of furnishing the instruction and facilities advertised.

It must be obvious that statistics compiled and data accumulated and treated in the manner herein indicated,* have a measure of value and accuracy not attainable by any agency restricted to the purely voluntary information contributed from interested sources and over which the agency may exercise no control. The importance of the recognition of a medical college as in "good standing" in Illinois, under the Medical Practice Act of the State, is felt throughout the entire country, since there is not a medical college that does not desire the recognition of its diplomas by this BOARD. It is this which has made it practicable to issue a series of reports on medical education and medical institutions, the trustworthiness and utility of which have not only never heretofore been questioned but which have been widely recognized both in this country and abroad as exercising a marked influence in raising the standard of medical instruction and of the qualifications necessary for the practice of medicine, and thereby improving the status of the medical profession, with consequent benefit to the public welfare.

* Before the publication of each issue of the report advance sheets, "proofs" or copies of the immediately preceding report, are sent to the proper officers of every institution concerned, with a request for examination, for the correction of any inaccuracies and for the addition of any new matter pertinent to the subject.

Among the most recent illustrations of this advance in the methods of the colleges, is the information just conveyed to the BOARD in letters from Dr. John C. Dalton and Prof. C. F. Chandler, of the College of Physicians and Surgeons of New York, announcing that "in addition to the examination for admission to its classes," which went into effect this last spring, the college has "adopted a regular three years' graded course, beginning the 1st of October, next, and for which the students will be divided into three classes with a prescribed course of study for each."

Jefferson Medical College has also recently decided to establish a three years' graded course after the session of 1889-90. Intimations have been received from other colleges that they will soon do likewise.

Medical Practice Act:

During the quarter, fines of \$100 each have been imposed upon J. W. Gay, "Indian Medicine Man;" F. Clark, Jr., John Kean, S. J. Dixon and Conrad Lunder. Other suits are pending. It is now one year since the new law went into effect, and nearly all who were required to take out certificates have done so. The effect of this law, especially with regard to itinerant showmen and mountebanks who sold medicines, has been marked and gratifying. The BOARD refused to grant licenses to this class, believing their business to be prejudicial to the interests of the people, and in so doing refused \$11,400 in license fees. During the month of June, 1887, there were twenty-two itinerant companies in the State whose sales daily amounted to about \$2,000. It is perfectly safe to assume that this law has saved the people of the State not less than \$250,000 during the past year.

Miscellaneous Office Work:

During the quarter ending June 30, 1888, there were received in the Secretary's office 1442 written communications, exclusive of diplomas submitted for verification, affidavits, letters of recommendation, etc., pertaining to 129 applications for certificates entitling to practice medicine, and to 19 applications from midwives. There were sent out during the same period 4,326 communications of all kinds; 45 copies of Annual Reports; 6,000 copies of Report of Proceedings of April, 1888, meeting; 33 copies of Official Register; 38 copies of Report on Medical Education; 7,500 House-to-House Inspection blanks; 564 copies of the Pre-

ventable-Disease Circulars; 2,100 Vaccination Certificates, and the usual number of other publications.

There were issued during this period 106 certificates, on diplomas of colleges which conform to the standard of minimum requirements; 12 to graduates of other colleges who were required to supplement their diplomas by evidence of proficiency in the subject or branch omitted by their college; 6 to doctors upon proof of more than 21 years' practice in the State; 5 to non-graduates, persons passing the examination of the BOARD; and 2 duplicates upon proof of loss or destruction of the original; 15 applications were rejected because of inability to comply with the law.

Certificates were also issued to 9 midwives, licentiates and upon proof of 21 years' practice in Illinois; and to 10 upon examination, 2 being rejected.

JOHN H. RAUCH, *Secretary*.

On motion of Dr. Clark the Secretary's report was received and ordered printed in the published proceedings of the BOARD.

In the matter of the recognition of the diplomas of a certain medical college, taken under advisement at Thursday's session, consideration thereof was resumed, and on motion it was decided not to issue certificates to three graduates of said school, whose applications were pending, for the reason that the school had not in their cases, complied with its own printed requirements or the requirements of this BOARD with respect to a preliminary education.

Consideration of the application of H. D. Flower, of Fulton, Ill., for a certificate was resumed, and counsel for Flower submitted argument and affidavit to disprove charges filed against him. The case was taken under advisement.

Adjourned until 2 P. M.

FRIDAY AFTERNOON.—BOARD met pursuant to adjournment, and first considered the application of G. B. Walker, of Chicago, for a certificate. Walker and counsel appeared before the BOARD and submitted a large number of affidavits in support of his (Walker's) good character and in denial of the charges filed against him. The case was continued for further investigation.

A number of other cases under the Medical Practice Act were considered and disposed of, and at 6 P. M. the BOARD adjourned.

QUARTERLY MEETING, CHICAGO, OCTOBER 25-26, 1888.

THE ILLINOIS STATE BOARD OF HEALTH met in regular quarterly session at the Grand Pacific hotel in Chicago, on Thursday, October 25, at 10 o'clock A. M. Present: W. A. Haskell, R. Ludlam, A. S. Clark, H. V. Ferrell, John H. Rauch—the President, Dr. Haskell, in the chair.

In the regular order of business the minutes of the last meeting, June, 1888, were read and approved, and on the call for reports from officers, the Secretary presented the following extract from his quarterly report:

COMPARATIVE STATEMENT OF THE EXPENDITURES OF THE ILLINOIS STATE BOARD OF HEALTH FOR THE FISCAL YEARS 1886, 1887 and 1888.

	YEAR ENDED—		
	Sept. 30, 1886.	Sept. 30, 1887.	Sept. 30, 1888.
Total expenditures.....	\$13,334 68	\$12,865 08	\$11,497 17
Expended from State appropriations	12,579 78	11,455 08	8,505 29
Expended from office receipts.....	754 90	1,410 00	2,991 88

The total expenditures for the fiscal year 1888 are \$1,367.91 less than for the fiscal year 1887, and \$1,837 51 less than for the fiscal year 1886.

The total cost to the State was \$2,949.79 less for 1888 than for 1887, and \$4,074.49 less than for 1886.

The Treasurer submitted his annual report, which, together with the accounts for the quarter, were referred to the auditing committee. A letter dated September 24, 1888, was read in regard to "Blue Mountain Joe;" a telegram was sent to Hon. E. Callahan, State's attorney, Robinson, Ill., to ascertain the pres-

ent status of the case. The remainder of the morning session was devoted to the transaction of routine business, and at 1:30 P. M. the BOARD took a recess until 2 o'clock P. M.

At the afternoon session the Secretary presented his quarterly report, as follows:

QUARTERLY REPORT OF THE SECRETARY.

On October 13, 1884, as the representative of the ILLINOIS STATE BOARD OF HEALTH at the opening of a national conference of State Boards of Health, I made an address entitled "Practical Recommendations for the Exclusion and Prevention of Asiatic Cholera"—which disease was then threatening to invade the United States. In the course of this address the status and the respective spheres of authority and action of the health services of the country—National, state and municipal—were defined and discussed. It was pointed out that the practical abolition of the National Board of Health, as to its executive functions, devolved additional responsibility upon State and municipal authorities, and it was urged that these should voluntarily combine for co-operation and concert of action in the face of what then seemed a pressing emergency. It was urged that in "States which have no Boards of Health, or whose boards are not vested with the necessary authority or provided with adequate resources, the people should be awakened to the necessities of the situation. Legislators should be thoroughly informed as to the facts and urged to provide suitable legislation." It was also urged that Congress should reorganize and rehabilitate the National Board of Health, or provide an efficient substitute—one clothed with increased power and supplied with ample funds to maintain an effective system of modern quarantine for the exterior; to maintain an interior sanitary inspection service for the great highways of travel by land and water; and to give judicious co-operation and substantial assistance to states and municipalities in preventing the introduction of epidemic diseases into one state from another, and in preventing their spread within the states themselves.

In further advocacy of this point I used the following language:

'Sooner or later the national government will be compelled not only to assume supervision of exterior quarantines, but to provide for a permanent system of co-operation with state and local governments in the administration of inter-state sanitation; in order, on the one hand, to prevent the introduction of exotic epidemic diseases, and, on the other, to prevent their spread from state to state along the great intra-national highways of travel and commerce. This is a national duty. It is one that the national government only can adequately discharge, and its expense is, equitably, one that should be defrayed from the national treasury.

"Such an organization as I suggest will be one agency for securing the assumption of this duty by the general government; and the present emergency offers a favorable time for pressing its consideration. Heretofore, legislation in the interest of public health has been obtained, as a rule, at the tail-end of an epidemic. It has too often been in the nature of locking the stable-door after the horse was stolen. Let us now see if we cannot reverse the process, and, while there is yet time, induce not only Congress, but states and municipalities to take the necessary action for securing a better protection of the public health.

"Just now this means more than the good to be found in the saving of human life and in avoiding the suffering and misery, the ruined homes and desolated families which an epidemic always leaves in its track. It means the prevention of panic; it means the prevention of the interruption of trade and commerce; it means the prevention of the loss of millions of dollars, all of which would inevitably result from an epidemic of Asiatic cholera in this country. Already the disease has cost Southern Europe not less than a hundred million dollars—six million dollars up to October 1st in trying to prevent its spread in Italy alone, with a loss of four million dollars even in the month of August, before the disease had effected a serious foot-hold; and now it is announced that the decrease of the national revenues of France has been materially aggravated by the reduction of receipts from railways, caused by the cessation of travel consequent upon the prevalence of the cholera epidemic.

"Shall we be warned in time, or shall we wait until the pestilence has landed and obtained a foot-hold? A single outbreak—possibly a single case—of Asiatic cholera in New York, or Chicago, or St. Louis or New Orleans, in our present condition, would cost the country millions of dollars, even though no epidemic spread should result. In 1879 the report of a single case of yellow fever in the south, caused a shrinkage in the provision market, in Chicago alone, which amounted to a million of dollars within 24 hours.

"With a perfectly feasible quarantine system, whose entire cost would not be a tithe of the losses of one epidemic, the chances of that single case may be made exceedingly remote. With an adequate sanitary organization—embracing within its scope the national authority, the state and municipal, each in its respective sphere—not one case, nor one hundred could establish an epidemic.

"Such an organization of the sanitary defences would inspire public confidence and prevent panic in the face of real danger—and panic is one of the worst complications of an epidemic, as fear is one of the most potent predisposing causes of epidemic disease."

Predictions Realized:

All this was said and published in 1884, and within four years thereafter—in 1888—the country witnessed the realization of every prediction of the results which it was then asserted would inevitably follow the neglect to secure an adequate organization of the sanitary defenses of the country. An epidemic of yellow fever, almost entirely confined to the boundaries of one sparsely settled and feasibly isolated State, caused widespread panic, the loss of millions upon millions of dollars in paralyzed business and embarrassed industries, and vexatious and often cruel interruption or suspension of travel by "shot-gun quarantines" with all their attendant barbarities and high-handed outrages, culminating in the arrest and imprisonment of harmless fugitives,* a thousand miles away from any infected locality, and the cold-blooded murder of travelers seeking to return to their own homes. Over and above all this, it is within bounds to assert that the aggregate suffering, disease and loss of life caused by this panic and its consequences of exposure, privation and effects upon the nervous system, ultimately exceeded the aggregate of suffering and loss of life by the epidemic disease itself.

One Item of Cost:

I have prepared a succinct account of the epidemic up to a recent date, but I now wish to add certain information bearing upon the economic questions involved, to secure which, in part, I addressed the following communication to the various transportation agencies in the area affected by the Florida epidemic:

*This refers to the arrest of two men in New York city on the 21st of September for the heinous crime of having escaped from Camp Perry and making their way north. They were conveyed to Brothers Island, in New York bay, and there confined for the remainder of their "term of ten days for observation." Prof. Proctor's life was sacrificed—or his chances of recovery from yellow fever at least destroyed—by a similar inhuman course of conduct which could only arise from confounding the precautions applicable to yellow fever with those necessary in a personally contagious disease such as small-pox. There was absolutely no justification for the removal of Prof. Proctor from his hotel to a hospital for infectious diseases; and while it was wholly unnecessary for the safety of the other guests at the hotel, it was the death warrant for the patient in the stage of the disease when the removal was made.

It may be further remarked that at no time during the season was the temperature of New York high enough to favor a diffusion of the yellow fever poison so as to endanger the health of its residents from this cause. The mean temperature for July, August and September was only a little over 68°, and even in August the mean for the month was only 71.6°.

ILLINOIS STATE BOARD OF HEALTH,
SPRINGFIELD, October 17, 1888.

DEAR SIR: Will you kindly furnish me at your very earliest convenience an approximate estimate of the loss to your road, direct and indirect, by the yellow-fever quarantines and panic of this year. I want these figures for use in a report which I am preparing upon this subject.

Ten years ago a national health service was established, and during its active existence in 1879, 1880 and 1881, unnecessary quarantines were almost entirely suppressed, panic was avoided, travel and traffic—except with the actually infected localities—were uninterrupted, and the public health was well protected. In the first year, 1879, the Illinois Central Railroad is on record as attributing a saving of forty per cent. on its traffic business to the agency of this service. Every transportation company, rail and river, in the Mississippi valley, the cotton exchanges, boards of trade and other commercial organizations gave similar testimony. I know whereof I speak when I assert that such a service would have prevented much of the loss, inconvenience and personal suffering which have been caused during the past season by the shot-gun and unnecessary quarantines in many localities. My efforts as Secretary and executive officer of the ILLINOIS STATE BOARD OF HEALTH and chairman of the Committee on Quarantine and Epidemics of the International Conference of State Boards of Health were exerted for the prevention or abandonment of such unnecessary interference with travel and traffic, and to restoring public confidence, and I am now anxious to utilize the lesson for future benefit.

It is not intended that the name of your road be given with its individual loss. I propose stating the aggregate losses of the transportation systems in the area affected, so that this information will not be used to your detriment. An early reply will oblige

Yours truly,

JOHN H. RAUCH.

From the replies received it is estimated that the transportation companies lost at least \$10,000,000 by unnecessary interference with travel and traffic.

Resumé of the Epidemic:

It is with the efforts above referred to—for the prevention or abandonment of unnecessary interference with travel and traffic and to restoring public confidence—that the remaining portion of this section will deal. During the earlier months of the spring of 1888, my attention had been attracted to certain suspicious circumstances relating to Florida, among which may be noted the declaration of quarantine by Denmark against all Florida and rumors of the existence of a suspicious form of fever in various places on the peninsula. There had been similar

rumors, followed by more or less emphatic denials, during the previous season; but it was taken for granted that the Marine Hospital Bureau, in discharging the duties of a national sanitary service, was fully advised and would make authoritative announcement if there were any ground for warning. It was not, however, until April 20th that the Bureau announced the recent existence of yellow fever at Micanopy, Plant City and Bartow, and "that several other points in the southern and western portions of the state are to be looked upon as suspicious." Gradually the facts leaked out that yellow fever, modified by temperature, had existed during the winter, and that the territory between Tampa and Jacksonville was infected. The *Weekly Abstract* of the Marine-Hospital Bureau, for the week ended April 26th, contained the first circumstantial statements to this effect, and it is noteworthy that they are contained in reports dated March 13th and 17th—that is, six weeks before their publication. In one of these reports it is stated that a continued fever, "resulting in from 6 to 8 per cent. of deaths," had been prevalent in Jacksonville for over two months, and that two physicians disagreed with the diagnosis of typhoid fever—one of them holding "the idea of a yellow fever wave overspreading the city." The report of March 13th, dated at Plant City, begins with the unqualified assertion that "there is yellow fever at this place, and evidently at other places in the state, of which due report will be made." And both reports urge the suppression of the information in deference to the local sentiment.

These indications lost none of their significance—but, the contrary,—from the belief that the introduction of the infection through the port of Tampa in May, 1887, and its subsequent unchecked diffusion were due to the policy of concealment and suppression of information by local health and quarantine authorities in Florida; nor from what is understood to be an authorized statement by the supervising surgeon of the Marine-Hospital Bureau, that he would "not do anything in regard to malignant diseases appearing in any part of the country until officially informed by the executive of the state in which such disease existed, that it was in an epidemic form, and, therefore, called for the national succor." Thus admonished, it became

the duty of every sanitary executive to study the developments of the situation with especial reference to the territory under his own immediate care.

In Illinois, the only point of danger was the city of Cairo, and I at once began a systematic observation of the meteorological and other conditions, not only of that place, but of the important points in the Mississippi Valley. Since the result of these observations largely influenced my official action as the executive and representative of the ILLINOIS STATE BOARD OF HEALTH, it will be well to clearly state the ground of my confidence in refusing to sanction the enforcement of quarantine in Illinois in September, 1888, and in advising against such procedure in certain other localities.

Temperature and Yellow Fever:

Among the few things which we do know positively and definitely concerning yellow fever, are its relations to heat and cold. Without knowing, with certainty, what its particulate cause may be, we do know that a temperature below 32° F. destroys the vitality of the cause, and that a continuous temperature of not less than 70° F. is necessary for its origin and spread. In this country, even in the Gulf States, yellow fever occurs as an epidemic only when the mean temperature rises to that of the tropical regions, and there is no instance of its epidemic spread in places north of 35° north latitude, except, in the language of Prof. Hirsch, "when the heat has equalled the mean annual temperature of the tropics; and it has on no occasion become diffused in a temperature below 20° C. [68° F.], the winter temperature of the tropics."*

As early as the beginning of the latter third of August it became apparent that the temperature necessary for a yellow-fever epidemic in Cairo would not be much longer maintained, and in my correspondence at this time I maintained this view—writing, for example, on the 23d to Dr. Garrison, of the West Virginia State Board of Health, in reply to his queries, that I did not think it necessary to do anything with regard to yellow fever; that the season was too far advanced, with the prevailing low temperature, to warrant any anticipation that the disease could extend much beyond the limits of Florida. On the 22d of

* Hirsch's Geographical and Historical Pathology, Vol. I, Page 351.

August the mean temperature was only 67.5° ; on the following day it was only 66.5° , and although there was subsequently an increase on the 25th to 76.5° , the average mean temperature for the last ten days of August was 71.4° and for the month was 74.5° . This latter was 3° lower than the average for 18 years—the entire period covered by the signal service observations—and the lowest recorded in 13 years, or since 1875. During this period, or rather for the previous 17 years, the September temperature had averaged about 8° lower than the August temperature, so that if only this average reduction should be maintained, the temperature for September, 1888, would be at least 1.5° below the minimum point which all authorities agree to be necessary for the diffusion of the yellow-fever poison. As a matter of fact the deficiency for the month proved to be more than double this—the mean temperature for 1888, September, being only 64.8° —the lowest ever recorded for that month at Cairo. Subjoined are tables compiled during the course of these observations and since completed from the meteorological tables in the various annual reports of the BOARD and from data kindly furnished by General Greeley, chief signal officer, U. S. A.:

TABLE NO. 1.

Mean temperature at Cairo, Ill., July, August, September, for 18 years: 1871–1888 inclusive.

YEARS.	July.	August.	September.	Mean of 3 months.
1871	79.3	79.5	67.2	75.3
1872	80.3	79.9	70.6	76.9
1873	78.8	78.6	68.8	75.4
1874	79.3	78.9	72.1	76.8
1875	78.8	73.6	68.0	73.5
1876	79.6	77.5	68.5	75.2
1877	78.7	77.5	70.0	75.4
1878	82.5	81.0	68.9	77.5
1879	82.5	75.8	66.8	75.0
1880	78.7	78.4	67.1	74.7
1881	82.3	84.8	75.1	80.0
1882	75.8	75.4	68.9	73.2
1883	77.7	74.8	68.0	73.5
1884	78.2	75.4	74.2	75.7
1885	80.0	76.5	69.3	75.2
1886	78.1	76.8	70.8	75.2
1887	80.5	78.0	71.1	76.5
1888	79.5	74.5	64.8	72.9

TABLE NO. 2.

Average Mean Temperature, Cairo, Ill.—July, August, September, from 1871 to 1888 inclusive, and Mean Temperature in certain Years.

	July.	August.	September.	Mean of 3 months.
Average mean for 18 years.....	79.4	77.5	69.4	75.4
Mean in 1873.....	78.8	78.6	68.8	75.4
" 1878.....	82.5	81.0	68.9	77.5
" 1888.....	79.5	74.5	64.8	72.9
Highest means—1881.....	82.3	82.7	75.1	80.0

The July temperature in 1888 was about normal; the August temperature 3° below, and September 4.6° below the normal, while the mean for the 3 months is the lowest on record.

TABLE NO. 3.

*Daily Temperature and Precipitation, Barometric Pressure and
Wind Movement at Cairo, Ill.—July, August, September, 1888.*

JULY.

Date.....	TEMPERATURE.			Precipitation, in inches and hundredths..	SUMMARY.

These observations were not confined to Cairo, but embraced the important points from Chicago to New Orleans, and from Jacksonville, Fla., to New York City. They included a study of the weekly bulletins issued from the Signal Office at Washington, the value of which for epidemiological purposes cannot be over-estimated. I quote the comments on temperature in weather-crop bulletin, No. 26, as an illustration:

Temperature—The week ending August 18th has been slightly warmer than usual on the middle Atlantic coast, in southern New England, and the interior of the southern states, while it has been cooler than usual in all other sections east of the Rocky Mountains, except in western Kansas, where the temperature was about normal. In the wheat and corn regions of the northwest and central valleys the average daily temperature was from 4° to 6° lower than usual. Light frosts occurred in Minnesota and Dakota, and killing frosts were reported from St. Vincent on Friday morning where the minimum temperature was as low as 34° .

The temperature for the season, from January 1st to August 18th, continues unusually low in the northwest and the lake regions, where the temperature has been from 3° to 6° lower than the average of previous years. Throughout the southern states the temperature for the season has differed but slightly from the normal, the departure being generally less than one degree.

For the 231 days from January 1 to August 18 the temperature in the southern states and including as far north as Memphis (latitude $35^{\circ} 8''$ N.) was, as thus stated, only slightly below the normal. But within the next four weeks the same conditions noted for the northwest and lake regions began to obtain in the Mississippi Valley, so that by September 15 the daily temperature was from 3° to 5° lower than the average of previous years. Thus up to the 18th of August the daily temperature had averaged only 1.7° less than the normal in St. Louis, 1.6° less in Cairo, not quite $.8^{\circ}$ less in Memphis, 1° less in Vicksburg and 1.2° less in New Orleans. By the middle of September the weather had grown so much cooler as to show average daily deficiencies during the intervening 28 days of 4.4° in St. Louis, 5.2° in Cairo, 4° in Memphis, 4.1° in Vicksburg and 3° in New Orleans. For the corresponding periods the deficiency in Nashville had been 1.5° up to August 18 and 5.4° between that date and September 15. Following is a tabular statement of these phenomena for eighteen principal cities:

TABLE NO. 4.

Cairo within the Yellow-Fever Isotherm:

While the city of Cairo is clearly within the isotherm of epidemic yellow-fever during these three months, and under the usual meteorological conditions it is manifest from the foregoing that these conditions did not obtain during the present year, and that before the middle of September all danger of diffusion from the introduction of yellow-fever infection had passed. It should be further observed that at no time was the city exposed, as in 1873 and 1878, by close communication with any infected district. In the former year, with an average mean temperature of over 75°, cotton, hides and other freight were received in large quantities direct from Shreveport and Memphis, where yellow-fever was raging, and yellow-fever cases were landed at Cairo from three different boats. Even then no one except persons who handled or came in contact with the infected freight, or members of the families of such persons, contracted the disease; there was no case due to the patients received, although four of these were in the stage of collapse when landed, and died soon after with black vomit. The disease did, however, occur at Centralia, 100 miles above Cairo, among those engaged in transshipping hides from Shreveport—there being a total of five cases with three deaths. Similarly in 1878, during the hot-

test summer on record with one exception, and while the Mississippi Valley was infected from Memphis to the Gulf, intercourse with the epidemic centers was only nominally restricted—the death-ship “Porter” landing cargoes of infection in August and the “James D. Parker” so late as August 24—when the fever had been declared epidemic in Memphis for more than a month—establishing a center of infection on Poplar street to which the origin of the Cairo epidemic of that year is attributed.

Neither climatic conditions nor conditions of exposure to the infection by water communication, the most dangerous and usual medium of diffusing a yellow-fever epidemic, obtained at Cairo in 1888, and by September 1st I had dismissed whatever apprehension might have been felt on this score. The general health of the Valley was good, and the sanitary status of Cairo itself was satisfactory, as shown by the following report of the health officer:

CITY OF CAIRO, ALEXANDER COUNTY, ILL.,
September 3, 1888.

J. H. Rauch, M. D., Secretary State Board of Health, Springfield, Ill.

SIR: Having no means at my disposal to hire a clerk, I am compelled to send you a condensed statement of the sanitary affairs of our citizens:

The city is divided into five wards, each of which has the following population: First ward, 2,091; second ward, 2,580; third ward, 2,712; fourth ward, 2,829; fifth ward, 3,432, making a total population of 13,714. By the school census of 1888, there are 2,263 males and 2,287 females under 21 years of age. The city is scattered over a territory covering 1,300 acres, which is rolling and drains to the lower lands and into the rivers, the rise and fall of which is 53 feet 2½ inches, the greatest on the rivers, except Cincinnati, Ohio, and Nashville, Tenn. The timber is all gone inside the city, except what is kept for shade.

The citizens have enjoyed excellent health the past year, having no contagious or infectious diseases. My own personal observation and the school census, showing the large percentage of children, have convinced me of the very healthful condition of our city.

Our sanitary work has been very thorough. A personal visit has been made to every house in the city, and a very careful inspection given to all premises. A daily visit is made to all hotels and boarding houses, and we run a large slop or garbage wagon every day, while many farmers haul away dry slops. The city being built upon a sandy soil, which quickly takes up all liquids, we are able to take care of this matter in a very satisfactory way. We feel that we have less standing water in our city than in any city in the State.

Our sewerage system is good, but not quite extended to the newly built portions of the city, but is being so extended as fast as there is a demand and the finances will permit.

The habits of our people are good, and their diet plain. There is more milk used here than in any city of this size in the State. We have about 900 milch cows, the milk from which is all used here. The natural pasture is fine at least eight months in the year.

Our water is taken from the Ohio river by water works; but three-fourths of our houses have cisterns. We have very few chronic drunkards, yet ours is not a prohibition town. Our citizens from the highest to the lowest, are willing at all times to obey any sanitary law. In three years' service I have had no one before a court for non-compliance with my orders, and the local Board of Health and myself are proud to serve such proper.

The school board have a law requiring all attending school to show a certificate of vaccination, and a register is kept, so that on this account, little is left for the health officer to do.

I am, very respectfully,

S. M. ORR, *Health Officer.*

Spread of the Panic:

Meanwhile in the territory beyond our own borders, panic was spreading and quarantines multiplying. There was growing distrust of the management of the epidemic in the infected region, and railroad lines entering the State from the south and south-east were subjected to various restrictions which foreshadowed non-intercourse quarantines enforced by the shot-gun. The disease was still confined to the Florida peninsula, but its effects upon the business interests of the country were daily becoming more widespread and marked, and the necessity was obvious for some action on the part of health authorities which would arrest the tendency to panic and restore confidence.

On September 14th I received a letter from Dr. J. D. Plunket, President of the Tennessee State Board of Health, inviting me to a conference to be held in Nashville on the 18th, for the purpose of considering the epidemic in Florida and its management. I spent Saturday in Chicago on official business, and set out for Nashville on the afternoon of the 16th. Both in Chicago and at other points the representatives of the press were eager to obtain the views of sanitarians and health officials on what had become an engrossing topic, and I availed myself of these opportunities to present the reasons which influenced my official action. I publicly opposed the applications of unacclimated

physicians and nurses to be sent to Florida, stating that "un-acclimated people or those who have not had yellow fever have no business going down there now to contract the disease and add to the number to be cared for. It may be very philanthropic and heroic but it isn't common sense. There are plenty of medical men and nurses south who have had yellow fever and who know how to treat the disease, whilst the northern people do not, as they have had no experience with it."

Concerning the general situation and the probability of a spread of the epidemic it was pointed out that "it is now too late in the season for yellow fever to spread in or to this State. There must be continued high temperature in order that yellow fever should spread as an epidemic. There is no danger in any part of the country north of the southern boundary of Tennessee and North Carolina, and probably there is no likelihood of any further spread of the fever except in the gulf states. As the executive officer of the STATE BOARD OF HEALTH, in charge of quarantine, I have been and am still perfectly willing to allow the Florida yellow fever refugees to come to this State, knowing that there is no danger.

"Florida has, unfortunately no State Board of Health, and the county boards are quarantining against each other. There the people are panic-stricken, and it is too late to give them any advice. Their methods of shot-gun quarantine are not only unnecessary, but exceedingly cruel and barbarous. The Texas quarantine against New Orleans is wholly unnecessary, and is only declared because New Orleans has five days for quarantine and Texas ports have ten days. But there is no yellow fever at New Orleans, and only during its prevalence would the quarantine be justified.

"Our efforts at Nashville will be directed toward restoring confidence and preventing any more foolish and useless quarantines. There has never been anything in the situation to warrant interference with travel and commercial intercourse except with the points directly infected. In 1879, notwithstanding the fact that we had yellow fever at Memphis and some thirty-eight or forty other points between that place and the Gulf, there was no such alarm and interruption of business.

"The National Board of Health had a perfect system of inspection, isolation, depopulation of infected places, and sanitary supervision of travel and traffic both by land and water; its certificates were based on actual knowledge, and commanded confidence wherever they were presented. The Illinois Central Railway company and other important transportation agencies are on record to the effect that the work of the National Board during that season was of inestimable benefit to the whole valley, and made a difference of millions of dollars in the volume of business.

"As compared with the interests involved, and the extent of territory infected from the previous year, for it should be remembered that the epidemic of 1879 was carried over from 1878, just as it is claimed this epidemic is the result of cases which occurred last fall—in these respects this Florida outbreak bears no comparison to the gravity of the situation in 1879 in the Mississippi valley.

"It furnishes no good reason for the degree of alarm and excitement which obtains. I trust this Nashville conference will be able to restore confidence and prevent further unnecessary interference with the business interests of the country."

The conference was attended by Drs. J. D. Plunket, President, and J. Berrien Lindsley, Secretary, of the Tennessee State Board of Health; Dr. Jerome Cochran, State Health Officer of Alabama; Dr. C. P. Wilkinson, President State Board of Health of Louisiana; Dr. H. D. Frazer, Secretary State Board of Health of South Carolina; Drs. J. N. McCormack, Secretary, and J. O. McReynolds, State Board of Health, of Kentucky; and Dr. J. H. Rauch, Secretary STATE BOARD OF HEALTH OF ILLINOIS.

Florida and Georgia, having no State boards of health, were not represented, and to this extent the conference was embarrassed in its purpose of securing coöperation and concert of action by State health authorities in the entire area affected by the Florida epidemic, with the view of providing all necessary protection for the public health by agencies which would command public confidence and thus prevent unnecessary interference with travel and traffic, allay groundless fear and prevent panic.

During the session I advocated the views already outlined, stating that my concern, as a State official of Illinois, was

chiefly with the business interests involved and threatened, and as a sanitarian with the wholly unnecessary suffering inflicted by the quarantines. I urged that, on the ground of humanity, the terror-stricken refugees should be allowed to get north of the danger line as speedily as possible; that quarantines of observation and detention for those desirous of coming into or passing through North Carolina, Tennessee, Kentucky and Illinois were not justified by the lateness of the season, the low temperature, the character and extent of the epidemic, nor by our experience of previous epidemics and our knowledge of yellow fever. In 1878 thousands of fugitives from Memphis and below were allowed to come into Illinois and Missouri, and although thirty-eight of these died of the disease in our own State, there was not a single case contracted from the refugees nor their effects outside of Cairo, where the temperature was the highest that had ever been recorded up to that time.

Defining the Danger Line:

The conference discussed and finally adopted the following propositions:

1. That owing to the lateness of the season and the unusually low temperature prevailing, there is no danger to be apprehended from the reception of fugitives from the yellow-fever district by any community north of latitude $36^{\circ} 30'$ North—the northern boundary of Tennessee.
2. That it is the duty of health and municipal authorities to prevent indiscriminate quarantines, and no place should be quarantined against until it has been definitely pronounced infected by yellow fever.
3. That it is not necessary to detain in camps of observation for ten days persons who wish to go north beyond the danger line.
4. That the management of the epidemic in Florida thus far has not been satisfactory, and a change in the methods is necessary.

In this connection, I wish to record my appreciation of the work done by the State Boards of Health of Tennessee and Kentucky, both in the interests of Illinois and of their own commonwealths. Dr. Plunket's action in calling this conference was wise and timely, and the attitude of the Tennessee board was ably supported by that of Kentucky. In my judgment the action of these boards was of greater pecuniary value to the material interests of their respective States than the total sum ever likely to be appropriated for their maintenance.

Cairo within the Yellow-Fever Isotherm:

While the city of Cairo is clearly within the isotherm of epidemic yellow-fever during these three months, and under the usual meteorological conditions it is manifest from the foregoing that these conditions did not obtain during the present year, and that before the middle of September all danger of diffusion from the introduction of yellow-fever infection had passed. It should be further observed that at no time was the city exposed, as in 1873 and 1878, by close communication with any infected district. In the former year, with an average mean temperature of over 75°, cotton, hides and other freight were received in large quantities direct from Shreveport and Memphis, where yellow-fever was raging, and yellow-fever cases were landed at Cairo from three different boats. Even then no one except persons who handled or came in contact with the infected freight, or members of the families of such persons, contracted the disease; there was no case due to the patients received, although four of these were in the stage of collapse when landed, and died soon after with black vomit. The disease did, however, occur at Centralia, 100 miles above Cairo, among those engaged in transshipping hides from Shreveport—there being a total of five cases with three deaths. Similarly in 1878, during the hot-

test summer on record with one exception, and while the Mississippi Valley was infected from Memphis to the Gulf, intercourse with the epidemic centers was only nominally restricted—the death-ship “Porter” landing cargoes of infection in August and the “James D. Parker” so late as August 24—when the fever had been declared epidemic in Memphis for more than a month—establishing a center of infection on Poplar street to which the origin of the Cairo epidemic of that year is attributed.

Neither climatic conditions nor conditions of exposure to the infection by water communication, the most dangerous and usual medium of diffusing a yellow-fever epidemic, obtained at Cairo in 1888, and by September 1st I had dismissed whatever apprehension might have been felt on this score. The general health of the Valley was good, and the sanitary status of Cairo itself was satisfactory, as shown by the following report of the health officer:

CITY OF CAIRO, ALEXANDER COUNTY, ILL.,
September 3, 1888.

J. H. Rauch, M. D., Secretary State Board of Health, Springfield, Ill.

SIR: Having no means at my disposal to hire a clerk, I am compelled to send you a condensed statement of the sanitary affairs of our citizens:

The city is divided into five wards, each of which has the following population: First ward, 2,091; second ward, 2,580; third ward, 2,712; fourth ward, 2,829; fifth ward, 3,432, making a total population of 13,714. By the school census of 1888, there are 2,263 males and 2,287 females under 21 years of age. The city is scattered over a territory covering 1,300 acres, which is rolling and drains to the lower lands and into the rivers, the rise and fall of which is 53 feet 24 inches, the greatest on the rivers, except Cincinnati, Ohio, and Nashville, Tenn. The timber is all gone inside the city, except what is kept for shade.

The citizens have enjoyed excellent health the past year, having no contagious or infectious diseases. My own personal observation and the school census, showing the large percentage of children, have convinced me of the very healthful condition of our city.

Our sanitary work has been very thorough. A personal visit has been made to every house in the city, and a very careful inspection given to all premises. A daily visit is made to all hotels and boarding houses, and we run a large slop or garbage wagon every day, while many farmers haul away dry slops. The city being built upon a sandy soil, which quickly takes up all liquids, we are able to take care of this matter in a very satisfactory way. We feel that we have less standing water in our city than in any city in the State.

Our sewerage system is good, but not quite extended to the newly built portions of the city, but is being so extended as fast as there is a demand and the finances will permit.

The habits of our people are good, and their diet plain. There is more milk used here than in any city of this size in the State. We have about 900 milch cows, the milk from which is all used here. The natural pasture is fine at least eight months in the year.

Our water is taken from the Ohio river by water works; but three-fourths of our houses have cisterns. We have very few chronic drunkards, yet ours is not a prohibition town. Our citizens from the highest to the lowest, are willing at all times to obey any sanitary law. In three years' service I have had no one before a court for non-compliance with my orders, and the local Board of Health and myself are proud to serve such proper.

The school board have a law requiring all attending school to show a certificate of vaccination, and a register is kept, so that on this account, little is left for the health officer to do.

I am, very respectfully,

S. M. ORR, *Health Officer.*

Spread of the Panic:

Meanwhile in the territory beyond our own borders, panic was spreading and quarantines multiplying. There was growing distrust of the management of the epidemic in the infected region, and railroad lines entering the State from the south and south-east were subjected to various restrictions which foreshadowed non-intercourse quarantines enforced by the shot-gun. The disease was still confined to the Florida peninsula, but its effects upon the business interests of the country were daily becoming more widespread and marked, and the necessity was obvious for some action on the part of health authorities which would arrest the tendency to panic and restore confidence.

On September 14th I received a letter from Dr. J. D. Plunket, President of the Tennessee State Board of Health, inviting me to a conference to be held in Nashville on the 18th, for the purpose of considering the epidemic in Florida and its management. I spent Saturday in Chicago on official business, and set out for Nashville on the afternoon of the 16th. Both in Chicago and at other points the representatives of the press were eager to obtain the views of sanitarians and health officials on what had become an engrossing topic, and I availed myself of these opportunities to present the reasons which influenced my official action. I publicly opposed the applications of unacclimated

physicians and nurses to be sent to Florida, stating that "un-acclimated people or those who have not had yellow fever have no business going down there now to contract the disease and add to the number to be cared for. It may be very philanthropic and heroic but it isn't common sense. There are plenty of medical men and nurses south who have had yellow fever and who know how to treat the disease, whilst the northern people do not, as they have had no experience with it."

Concerning the general situation and the probability of a spread of the epidemic it was pointed out that "it is now too late in the season for yellow fever to spread in or to this State. There must be continued high temperature in order that yellow fever should spread as an epidemic. There is no danger in any part of the country north of the southern boundary of Tennessee and North Carolina, and probably there is no likelihood of any further spread of the fever except in the gulf states. As the executive officer of the STATE BOARD OF HEALTH, in charge of quarantine, I have been and am still perfectly willing to allow the Florida yellow fever refugees to come to this State, knowing that there is no danger.

"Florida has, unfortunately no State Board of Health, and the county boards are quarantining against each other. There the people are panic-stricken, and it is too late to give them any advice. Their methods of shot-gun quarantine are not only unnecessary, but exceedingly cruel and barbarous. The Texas quarantine against New Orleans is wholly unnecessary, and is only declared because New Orleans has five days for quarantine and Texas ports have ten days. But there is no yellow fever at New Orleans, and only during its prevalence would the quarantine be justified.

"Our efforts at Nashville will be directed toward restoring confidence and preventing any more foolish and useless quarantines. There has never been anything in the situation to warrant interference with travel and commercial intercourse except with the points directly infected. In 1879, notwithstanding the fact that we had yellow fever at Memphis and some thirty-eight or forty other points between that place and the Gulf, there was no such alarm and interruption of business.

"The National Board of Health had a perfect system of inspection, isolation, depopulation of infected places, and sanitary supervision of travel and traffic both by land and water; its certificates were based on actual knowledge, and commanded confidence wherever they were presented. The Illinois Central Railway company and other important transportation agencies are on record to the effect that the work of the National Board during that season was of inestimable benefit to the whole valley, and made a difference of millions of dollars in the volume of business.

"As compared with the interests involved, and the extent of territory infected from the previous year, for it should be remembered that the epidemic of 1879 was carried over from 1878, just as it is claimed this epidemic is the result of cases which occurred last fall—in these respects this Florida outbreak bears no comparison to the gravity of the situation in 1879 in the Mississippi valley.

"It furnishes no good reason for the degree of alarm and excitement which obtains. I trust this Nashville conference will be able to restore confidence and prevent further unnecessary interference with the business interests of the country."

The conference was attended by Drs. J. D. Plunket, President, and J. Berrien Lindsley, Secretary, of the Tennessee State Board of Health; Dr. Jerome Cochran, State Health Officer of Alabama; Dr. C. P. Wilkinson, President State Board of Health of Louisiana; Dr. H. D. Frazer, Secretary State Board of Health of South Carolina; Drs. J. N. McCormack, Secretary, and J. O. McReynolds, State Board of Health, of Kentucky; and Dr. J. H. Rauch, Secretary STATE BOARD OF HEALTH OF ILLINOIS.

Florida and Georgia, having no State boards of health, were not represented, and to this extent the conference was embarrassed in its purpose of securing coöperation and concert of action by State health authorities in the entire area affected by the Florida epidemic, with the view of providing all necessary protection for the public health by agencies which would command public confidence and thus prevent unnecessary interference with travel and traffic, allay groundless fear and prevent panic.

During the session I advocated the views already outlined, stating that my concern, as a State official of Illinois, was

chiefly with the business interests involved and threatened, and as a sanitarian with the wholly unnecessary suffering inflicted by the quarantines. I urged that, on the ground of humanity, the terror-stricken refugees should be allowed to get north of the danger line as speedily as possible; that quarantines of observation and detention for those desirous of coming into or passing through North Carolina, Tennessee, Kentucky and Illinois were not justified by the lateness of the season, the low temperature, the character and extent of the epidemic, nor by our experience of previous epidemics and our knowledge of yellow fever. In 1878 thousands of fugitives from Memphis and below were allowed to come into Illinois and Missouri, and although thirty-eight of these died of the disease in our own State, there was not a single case contracted from the refugees nor their effects outside of Cairo, where the temperature was the highest that had ever been recorded up to that time.

Defining the Danger Line:

The conference discussed and finally adopted the following propositions:

1. That owing to the lateness of the season and the unusually low temperature prevailing, there is no danger to be apprehended from the reception of fugitives from the yellow-fever district by any community north of latitude $36^{\circ} 30'$ North—the northern boundary of Tennessee.
2. That it is the duty of health and municipal authorities to prevent indiscriminate quarantines, and no place should be quarantined against until it has been definitely pronounced infected by yellow fever.
3. That it is not necessary to detain in camps of observation for ten days persons who wish to go north beyond the danger line.
4. That the management of the epidemic in Florida thus far has not been satisfactory, and a change in the methods is necessary.

In this connection, I wish to record my appreciation of the work done by the State Boards of Health of Tennessee and Kentucky, both in the interests of Illinois and of their own commonwealths. Dr. Plunket's action in calling this conference was wise and timely, and the attitude of the Tennessee board was ably supported by that of Kentucky. In my judgment the action of these boards was of greater pecuniary value to the material interests of their respective States than the total sum ever likely to be appropriated for their maintenance.

After participating in the conference at Nashville, I proceeded to Washington *via* Chattanooga; and, although coming from Nashville that day, before I was allowed to enter Chattanooga I was required to show a certificate. I found Chattanooga in a panicky condition, owing to the death of a refugee from Decatur at Wildwood in Georgia. The patient was removed from a train at Wauhatchie by the Chattanooga authorities. The probabilities are that the exposure incident to his lying in the rain on the platform of the depot hastened his death. Chattanooga authorities no doubt thought that this saved their city from pestilence, although at that time there was scarcely a possibility of yellow fever obtaining a foothold there.

Quarantine Barbarities:

Here I desire to call particular attention to the manner in which, in some of the states, suspects and those prostrated by the fever have been treated by the enforcement of the so-called quarantines. This hunting down of unfortunates, who are left to die because they have, or are suspected to have, yellow fever, should no longer be tolerated in this country. No place, city, or town, should have the power to exercise quarantine unless it has at the same time the means of taking care of those detained.

Upon approaching Washington I was met by a quarantine inspector, who simply asked me whence I came. Comment is unnecessary.

On September 20th it was definitely announced that there was yellow fever at Decatur, and on the 21st at Jackson, Miss. The panic that ensued from these announcements spread throughout the Gulf states, and the effect was plainly visible north of the danger line. Within forty-eight hours after the announcement of the occurrence of the cases at Jackson, Miss., every wheel was stopped on a line of rail extending from the Gulf to Cairo, and on two other lines the stoppage of traffic was nearly as complete, while the steamboat companies were obliged to "lay up," although there was not a case of yellow fever along the whole of the Mississippi river.

In Washington there was an uneasy feeling in the community. In Philadelphia the Board of Health requested the Marine-Hospital service to continue its quarantine inspection after the first

of October at the Delaware breakwater. A medical society in New York passed a resolution asking that quarantine be more rigidly enforced against the infected localities. Two unfortunate victims were arrested by the health authorities of New York city for having broken their parole at Camp Perry; they were sent to Brothers Island for the remainder of the term of ten days after leaving Jacksonville. This proceeding was wholly unwarranted and unnecessary, as it was simply impossible for yellow fever to spread from them in New York at that time. Other symptoms of panic were manifested at other places where they were wholly out of danger, the health authorities in some of the places not realizing the difference between the sanitary treatment of yellow fever and that of small-pox.

Baltimore and Louisville form notable exceptions; and although a number of deaths occurred at the latter city among refugees from Decatur, Alabama, there was no spread of the disease. On September 24th a refugee from Decatur reached Rockford, Illinois, and died on the 29th, but there was no spread of the disease.* On the 25th a refugee from Decatur arrived at Mt. Carmel, Illinois, and recovered, without spread of the disease. Hundreds of instances of a like character were to be found in the State of people who had left Florida much earlier, without being sick, or spreading the disease in the localities in which they temporarily resided.

In this connection I wish to emphasize the fact that not a single case of yellow fever occurred in the State of Tennessee during the season. In fact, all the quarantines and other precautions taken north of the southern boundary of that State after the 16th of September were wholly unnecessary.

Quarantine at Cairo:

While at Nashville I received a telegram from the office of the BOARD—with which I was in constant communication—announcing that Cairo had quarantined against Jacksonville, Fla., and Decatur, Ala., and asking financial aid from the BOARD for the pay of inspectors. The sickness at Decatur had not at this time (September 17), been definitely pronounced yellow fever. Aside from this, however, the considerations already set forth

* See clinical history of this case appended.

forbade me, as the executive officer and representative of the BOARD, from assisting by the use of the public moneys of the State, or from giving the authority of the BOARD to a quarantine which was wholly unnecessary and unjustifiable on the score of the public health; which, to the extent that it was enforced, would be detrimental to the public revenues, and to the same extent would injuriously affect the business and industries of the communities concerned.

I felt so strongly convinced of the soundness of the premises upon which my conclusions were based, and upon the extent and accuracy of my information—which embraced every important point in the Valley and Gulf States—that I at once sent the following dispatch:

NASHVILLE, TENN., September 17, 1888.

To S. M. Orr, Health Officer, Cairo, Ill.:

Make no attempt to enforce quarantine. No possible danger from yellow fever. Season too late. STATE BOARD will not expend any money for such purpose for the reason that it is wholly unnecessary. The existence of yellow fever at Decatur is still a matter of doubt. Am here on sanitary and quarantine business.

JOHN H. RAUCH.

Dr. Cochran subsequently pronounced the cases at Decatur to be yellow fever, and further telegrams from the same officer kept me advised of the status—the extent of the depopulation of the town before the place became dangerously infected, the subsequent establishment of a cordon, etc. In the same way communication was maintained with Dr. Rutherford, State Health Officer of Texas, Drs. Wilkinson and Salomon, of New Orleans, Dr. Wirt Johnson of Jackson, Miss., Dr. McCormack at Louisville and Bowling Green, Ky., Dr. Plunket at Nashville, Dr. G. B. Thornton at Memphis, Dr. Thos. B. Wood, Secretary of the North Carolina State Board of Health, and others.

On the 22d I learned that Cairo had established quarantine, notwithstanding my protest, and immediately set out for that place, telegraphing the mayor of Cairo from Harrisburgh, and asking for a reply at Altoona en route. Apparently this request was misunderstood, and I first read the reply in a Chicago paper on the 23d. I again telegraphed: "Do not interfere with through passengers. Opinion as to necessity for quarantine unchanged. Will be in Cairo in the morning." Passing through

Anna on the morning of the 24th I counseled the authorities at that place against enforcing any quarantine restrictions, and on arriving in Cairo found a public sentiment so closely bordering upon panic that it was obvious the authorities had established quarantine mainly on that account. Meanwhile there was no yellow fever nearer than Decatur, Ala.—258 miles—and Jackson, Miss.—367 miles—both of which places were completely isolated and in charge of experienced yellow fever experts and sanitarians, and the intervening distance covered by numerous “shot-gun quarantines.” The mean temperature on the day of my arrival was only 64° and the next day it fell to 63°. The danger line was steadily and rapidly drawing away from Cairo, and it had long been a physical impossibility for any number of refugees to have caused a case of yellow fever among the citizens. The sanitary question had, in fact, never attained any importance, and my visit to Cairo was less in the interest of the public health, which was not endangered, than in the interests of business threatened by the abuse of quarantine.

I urged these considerations upon the attention of the authorities and prominent residents, and on the morning of the 25th addressed the members of the local board of health to the same purpose. The board of county commissioners of Pulaski county presented an application, calling upon the STATE BOARD to take immediate action for the enforcement of quarantine against southern travelers entering that county. The application was, of course, refused for the reasons assigned, and during the day there were indications of returning confidence and abatement of the unreasoning alarm. In the afternoon I went up to Anna and Cobden, and caused the quarantine restrictions to be abandoned at those points, as well as at Mound City.

Unfortunately, at this juncture there was received the report of a suspicious case at Memphis, and although it was soon proved to be unfounded it served to renew the alarm and prolong the restrictions. Referring to this case, I think it proper to call attention to the courageous and conscientious discharge of his duty by Dr. G. B. Thornton, President of the Memphis Board of Health, and member of the State Board of Health of Tennessee. The circumstances of the Binford case were such as to warrant it being designated a “suspicious case,” and, in ac-

cordance with his obligations to the members of the Sanitary Council of the Mississippi Valley and the health authorities of other States, he promptly notified them to that effect. The necessary precautions were taken in the locality, the case was isolated and put under observation, and when, within twenty-four hours after the first report, it was announced not to be yellow fever, implicit credence was given to the statement. So long as Dr. Thornton shall continue in his present official capacity the people of the Mississippi Valley will feel assured that they have nothing to dread from concealment as to the sanitary status of Memphis. With such sanitarians in general control, public confidence during an epidemic would not be so readily disturbed, panics would be prevented and unnecessary quarantines avoided. Distrust and dread that the facts are being concealed add greatly to the complications of every epidemic.

Before the close of the month all restrictions on travel and traffic in Illinois had been removed, and the irresponsible, unwarranted and illegal quarantines throughout the Valley had been abandoned or materially modified.

Where Lies the Responsibility:

Even before the epidemic was closed, the medical press of the country was asking: "Who is responsible for the failure to stamp out the disease in the early spring, when it was well known that it had survived the winter on the soil of Florida and, with the recurrence of warm weather, was certain to become epidemic if any reliance could be placed upon previous experience?" The public was asking: "Is there no method by which the unnecessary hardships, the paralysis of commerce and industry, and the general demoralization which have been witnessed again this season, after an interval of ten years, can be prevented?"

The national congress, which adjourned before the epidemic was over, again showed its inability, or its indisposition, to deal broadly and intelligently with the subject. The offer of a prize of \$100,000 for a "sure cure" for yellow fever and the proposal to establish permanent camps of refuge in the yellow fever district at a cost of \$500,000, were equally unworthy of serious consideration. They were based upon the assumption of an in-

definite epidemic recurrence of the disease; they ignored the resources of sanitary science and preventive medicine; they traversed the wise old adage concerning the relative values of prevention and cure.

Yellow fever is an exotic disease, as incapable of direct origin in this country as is small pox or Asiatic cholera. Its poison may, under exceptional conditions, survive the mild winter of the gulf littoral; but, as a rule, epidemics of yellow fever in the United States are the result of new and repeated importations of the poison from abroad. Its epidemic appearance has always been in direct ratio to the freedom and extent of our commercial intercourse with the West Indies and the Spanish Main. Thus, for a period of nearly thirty years, ending in 1791, the country was substantially exempt from yellow fever, an exemption due to the suspension of direct commerce with the West Indies through the enforcement of the colonial acts by Great Britain.* After the Declaration of Independence, commerce with the West Indies and the Spanish Main was gradually re-established, and in 1791 began the yellow fever epoch of quarantine following the increasing ravages of the pestilence in the principal seaports of the country.

An obvious inference is that yellow fever may be excluded from this country by a judicious system of maritime and port sanitation, founded upon actual knowledge of the yellow-fever poison through its manifestations and characteristics.

Concerning these manifestations and characteristics we know that—whatever the specific cause may be—it is capable of growth and reproduction; that it is transportable only by adhesion to the surface of articles, or by the air from an infected locality confined in otherwise empty compartments; that it is a ponderable cause, seeking low levels; volatile, in the sense of being dissipated in freely-moving currents of air, but not in the sense of a capability of being carried in the atmosphere to any distance with retention of its morbidic potency. We know that a temperature of less than 32° F. will destroy the poison outright, and that it requires a continuous temperature of over 70° for its epidemic propagation and diffusion. We know that the higher the temperature, other favoring conditions being equal,

* *Coast Defences Against Asiatic Cholera: Report of an inspection of the Atlantic and Gulf quarantines*, by JOHN H. RAUCH, M. D., Springfield, Ill., 1886.

the more rapid and wide-spread will be its epidemic diffusion and the graver the character of the disease it produces. We also know that certain methods of chemical disinfection will destroy the poison artificially; that it is destroyed naturally by aëration; and that its growth and reproduction are connected with the presence of filth in the sanitary sense of that word, including decaying organic matter and defective ventilation.*

It is true that this knowledge is not exhaustive, but it is sufficient for the basis of rational and successful methods for the exclusion of the yellow-fever poison from the country; for the control and suppression of yellow fever epidemics when they occur; and for the prevention of panic with its consequent demoralization, human suffering and material losses. To enforce such methods requires the intelligent action of municipal health authorities, aided and directed by the broader power of the commonwealth exerted through an efficient State Board of Health; the State Boards co-operating with one another through voluntary conferences or other form of organization; and the whole compacted, reinforced, assisted and advised by a national health service commensurate with the vital interests involved. Both personally and officially, my views on this subject are matters of record, and they have been repeatedly endorsed and approved by this BOARD.

For several years I have urged the creation of a State Board of Health in Florida, and have furnished documents and papers and other information for use at every session of the legislature for five or six years. Two years ago the President of the ILLINOIS BOARD, Dr. Haskell, while visiting the peninsula, lost no opportunity of personally appealing to members of the profession, and to legislators to the same end. The large influx of northern capital, the growing popularity of the region as a health resort, and the increased facilities of communication all combined to add to the importance of necessary agencies for the protection of the public health in a region so much exposed by its geographical position to the invasion of the tropical pestilence.

* Circular No. 5—National Board of Health, July 12, 1879. Dr. John H. Rauch—"Memorandum for a Classification of Articles of Freight for Quarantine Purposes," Proc. San. Council of the Mississippi Valley, 1881. Prof. August Hirsch—Handbook of Geographical and Historical Pathology, 1883. Prof. Joseph Jones—Article "Yellow Fever," Quain's Dictionary of Medicine, 1884. Prof. S. M. Bemiss—Article "Yellow Fever," Pepper's System of Medicine, 1885.

The effect of a competent State health authority in Florida would have been to prevent the policy of suppression and concealment of facts last year by the local authorities, and proper efforts would have been made to stamp out the infection and to secure a thorough sanitation of the region during the winter—such as was effected after the epidemic of 1879 in the localities visited by yellow fever in the Mississippi valley. In time such an authority would secure a system of sanitary quarantine which would guard the Florida ports as effectually as the Louisiana State Board of Health now guards the delta of the Mississippi. Properly aided by the National government such a system would be perfected by prompt notification of danger, by the patrol of all waters by the vessels of the Revenue Marine, and by the efficient operation of a sufficient number of refuge stations for the treatment of infected vessels and the proper care of their people.

The Florida epidemic of 1888 will not be without its compensation if its lessons are utilized to hasten the adoption of such a system of sanitary defenses—not for any single State, but for the whole country; and not against yellow fever only but against all preventable disease, whether of domestic or of foreign origin.

One Fatal Case in Illinois:

Among the refugees who arrived in the State, yellow fever resulted fatally in one case, which arrived in Rockford, September 24, suffering with the initial symptoms. Dr. Helm, the attending physician, has furnished the following clinical history:

ROCKFORD, ILL., October 4, 1888.

DR. JOHN H. RAUCH:

DEAR SIR: Mrs. Prince, the Decatur refugee, went to that city about six weeks since to join her husband, who located there last March. Mr. Prince was the third one to be attacked in Decatur, and his was the first typical case.

His wife nursed him alone from Monday, September 17, until Friday, September 21, when he died, and the following day, September 22, she started north, reaching this city Monday, September 24, at 8 P. M.

I met her at the depot and took her directly to the pest house, where everything had been prepared for her. She was given a bi-chloride bath and change of clothing, and put to bed at once.

Complained of feeling lame, tired and somewhat chilly, but had no severe pain. Pulse 160, and temperature 100.5 After three hours' rest pulse dropped to 130. Her mother staid with her and the next day another nurse was obtained.

Tuesday A. M.—Slept well, but waked with decided pain in back and head. Pulse 120 and temperature 102.5; urine free, high-colored and contained no albumen. Sweating profusely.

Tuesday P. M.—Pulse 120, temperature 103.5 More pain in back; still sweating freely. Urine free, high-colored and no albumen. No nausea or epigastric tenderness.

Wednesday A. M.—Pulse 104, temperature 104°. Still sweating. Urine free, high-colored, and 15 per cent. albumen found. No nausea or epigastric tenderness. Marked dryness of mouth and throat. Still a good deal of pain in head and back.

Wednesday P. M.—Pulse 100, temperature 101. Vomited once, a clear fluid. No epigastric tenderness. Pain decreasing. Urine still free, but more albumen found.

Thursday A. M.—Pulse 96, temperature 100°. Vomited twice during night, last time mostly bile. Pain all gone. Throat still more dry and quite sore. Urine quite free, but containing 40 per cent. albumen.

Thursday P. M.—Pulse 38, temperature 99°. Vomits frequently. Matter ejected becoming quite black at times. Retains very little water or nourishment. Pressure on epigastrium causes pain and distinct jaundice.

Friday A. M.—Pulse 80, temperature 98°. Vomited three times. Coffee grounds, but not very copious. Emesis very difficult and caused much burning in throat. Urine still quite free and less albumen found. Profound exhaustion. Began rectal feeding.

Friday P. M.—Pulse 96, temperature 98.5. Vomited only once, and then a clear fluid. Urine still free and contained only a trace of abumen. Enemata all retained and pulse seemed stronger, but mild delirium had set in at noon.

Saturday A. M.—Urine suppressed. Profound coma. Death at 8:30 A. M. Disinfectants and deodorants were freely used, yet there was a sickening odor in the room constantly during the last two days.

Immediately after death the body was wrapped in a disinfectant sheet, and soon the undertaker arrived with an air-tight metallic casket, in which the body was buried on the pest house grounds temporarily.

Yours hastily,

W. B. HELM.

The Public Health:

Aside from an extension of small-pox from East St. Louis to the county farm at Belleville, St. Clair county, there has been no further outbreak in Illinois since last June. There were thirteen cases on the county farm—no deaths—and at the close of the quarter the State is reported free from contagion. There

are, however, indications of an approaching small-pox epidemic throughout the country. The disease was reported during the quarter in Canada, Massachusetts, Connecticut, New York, Pennsylvania, Ohio, Tennessee, Iowa, Minnesota and California, and the origin of some of the outbreaks has been traced to immigrants from Europe and China. Vaccination and re-vaccination have been urged upon all communities known to be exposed, and there yet remain several weeks of mild weather for a large portion of the State, and in which the operation may be safely performed.

There have been localized outbreaks of diphtheria reported at Marissa, Venedy, Coultersville, Marseilles, Cable and Oconee; of typhoid fever at Venedy and Springfield, and of scarlet fever at Roseville and Marshall. The preventable-disease circulars of the BOARD have been furnished to these places, and the outbreaks have been promptly suppressed wherever the instructions have been carried out.

A Disgraceful Jail:

On the 14th of July I made an inspection of the Tazewell county jail at Pekin, concerning which I subsequently wrote to the sheriff in unqualified condemnation of the structure. That portion of it in which the male prisoners are confined consists chiefly of a room 27x28 feet, and 8½ feet high; this is divided by heavy iron bars into eight cells and, with its stone floor resting directly upon the ground, resembles a cage for wild beasts rather than anything designed for human occupancy. The only ventilation is by three small apertures, 27x30 inches, fully one-third of the space obstructed by heavy iron-work. These apertures are situated in the upper part of the wall, thus still further reducing their ventilation value, which is only nominally aided by two so-called air-shafts. Openings through the stone flagging in corners of the room communicate directly with shallow holes in the ground which constitute the only cloacæ. To empty these it is necessary to tear away the outside wall and then rebuild. The result may be imagined, but not described. Diarrhœas and low continued fevers prevail among the prisoners confined in this damp, noisome stone dungeon. If this jail is the result of a studied effort to outrage every law of health, humanity and decency, the effort is a disgraceful success.

Medical Education:

At the meeting of the BOARD in July, 1887, a resolution was adopted defining the phrase, "medical colleges in good standing,"—as used in the first section of the act to regulate the practice of medicine, approved June 16, 1887—to mean "Only those colleges which shall, after the sessions of 1890-91, require four years of professional study, including any time spent with a preceptor, and three regular courses of lectures, as conditions of graduation, and shall otherwise conform to the schedule of minimum requirements heretofore adopted by the BOARD."

As already observed in previous reports, the better class of medical schools are endorsing this action of the BOARD by conforming their courses of study and requirement for graduation to this standard. During the past quarter information has been received to this effect from the Medical College of Ohio, the Miami Medical College, the Medical College of Indiana, and the Chicago Homeopathic Medical College, and I am also authorized to announce that the Medical Department of the University of Nashville and Vanderbilt University will adopt the same course.

‡ By the time that the standard adopted in the foregoing resolution takes effect—to-wit, after the sessions of 1890-1891—it is probable there will be as general a compliance as there was with the schedule of minimum requirements adopted by the BOARD to take effect after the sessions of 1883-84. A large number have already increased their terms from two to three years, and the forthcoming report on medical education will show a higher standard and greater progress than ever before.

Office Work and Miscellaneous:

During the quarter ended September 30, 1888, there were received in the Secretary's office 1,073 written communications, exclusive of diplomas submitted for verification, affidavits, letters of recommendation, etc., pertaining to 83 applications for certificates entitling to practice medicine, and to 21 applications from midwives. There were sent out during the same period 894 communications of all kinds; 51 copies of the Annual Reports; 3,750 copies of Report of Proceedings of June, 1888, meeting; 16 copies of Official Register; 38 copies of Report on Medical

Education; 962 copies of Preventable-Disease Circulars; 8,100 Vaccination Certificates, and numerous other publications of the BOARD.

There were issued during this period, 61 certificates based on diplomas of colleges which conform to the standard of minimum requirements; 15 to graduates of other colleges who were required to supplement their diplomas by evidence of proficiency in the subjects or branches omitted by their respective colleges; 4 to doctors upon proof of more than 21 years' practice in the State; 1 to a non-graduate passing the required examination and three duplicates upon proof of loss or destruction of the original; 12 applications were rejected because of the inability to comply with the law. Certificates were also issued to 13 midwives, licentiates and upon proof of more than 21 years' practice in the State, and to 7 upon examination, 5 being rejected.

Satisfactory progress has been made in the investigation of the water supplies of the State, and in the collection of data concerning the underground supplies. Analyses of 570 samples of water have now been made, and by the close of the season an aggregate of about 640 will have been completed. Special attention has recently been paid to the character of the Mississippi river water, and to the other public water supplies of cities and towns, and to the water supply of all State institutions. In addition to the points noted in last report samples are now collected from East Dubuque, Rock Island, Quincy, Alton, East St. Louis, Chester and Cairo—at the latter point both from the Ohio and Mississippi; also the public water supplies of Belleville, Danville, Kankakee, Lincoln, Bloomington, Aurora, Elgin, Freeport and Morrison.

Respectfully submitted,

JOHN H. RAUCH, *Secretary*.

At the conclusion of the reading of the Secretary's report, on motion of Dr. Ferrell, it was received and ordered printed in the published proceedings of the BOARD. Dr. Clark submitted the following preamble and resolutions, which were unanimously adopted:

WHEREAS, It is conclusively shown by the report of the Secretary that yellow fever at no time during the season of 1888 threatened the welfare of the State of Illinois from a sanitary standpoint, but that the public

welfare was not only threatened but seriously injured in its material interests by the unnecessary, unwarranted and illegal quarantine restrictions enforced by communities both in our own State and elsewhere; therefore, be it

Resolved, That the STATE BOARD OF HEALTH of the State of Illinois hereby endorses and approves the action of its Secretary in exerting his influence as the representative of this BOARD and as Chairman of the International Committee on Quarantine and Epidemic Diseases, for the modification or abandonment of quarantine restrictions on the ground of humanity and in the interests of the industries of the country.

Resolved, That this BOARD hereby endorses and approves of the action of its Secretary in refusing to promise financial aid to the maintenance of quarantine at Cairo, in refusing to declare quarantine for Pulaski county, and in exerting the authority of the BOARD for the abandonment of all quarantine restrictions in the State.

The remainder of the afternoon session was occupied in the consideration of cases under the Medical Practice Act, and at 5:30 o'clock P. M., the BOARD adjourned to 10 o'clock Friday morning.

FRIDAY, OCTOBER 26.—The BOARD met pursuant to adjournment.

Present, as before, together with Dr. Newton Bateman.

The consideration of cases under the Medical Practice Act was resumed, and arguments were heard and evidence examined in the matter of the application of Mrs. Keck, of Davenport, Ia., for a certificate entitling her to practice medicine in Illinois. Decision was postponed in the absence of the applicant, and her attorney was notified that personal presence for examination was necessary under the law. The legal points raised in the argument of the applicant's attorney were referred to the counsel of the BOARD for his opinion.

In the matter of the application for recognition of its diplomas by a Polish school of midwifery, located in the city of Chicago, and in which instruction is given only in the Polish language, the BOARD listened to the argument of the attorney for the school, and subsequently took the application under advisement.

In the matter of the application of F. D. Clarke, of Chicago, for a certificate entitling him to practice medicine in Chicago—continued from Thursday's session—the applicant, by his attorney, refused to appear in person before the BOARD to answer the charges made against him, and which, if not disproved,

would bring the case within the purview of that clause of the twelfth section of the Medical Practice Act which provides that if "it shall be ascertained and determined by said BOARD OF HEALTH that the person so applying for a certificate is of immoral character, or guilty of unprofessional or dishonorable conduct, * * * said BOARD OF HEALTH may reject such application." The demand of the BOARD for the personal appearance of the applicant and the statement of his attorney—together with the charges, evidence, replies and arguments—were entered of record in the case.

In the long-pending case of the application of G. B. Walker, of Chicago, for a certificate entitling him to practice medicine in Illinois, a request was preferred for further time by the attorney now representing the applicant. His former attorney had withdrawn from the case, and the new attorney represented that his attention had only been given to the matter for the first time on the previous day. The request for an extension of time was granted.

At the afternoon session several minor cases were acted upon. The auditing committee reported that it had examined and approved the annual report of the Treasurer for the fiscal year ended September 30, 1888, showing total receipts for the year amounting to \$2,686.00, to which add \$876.47—balance on hand October 1, 1887—making a total accountability of \$3,562.47. The total amount of accounts paid by the Treasurer on orders of the BOARD was \$3,169.51, leaving a net balance on hand October 1, 1888, of \$555.59.

The auditing committee also reported back vouchers for the accounts of the quarter, amounting to \$3,018.91—examined and found correct.

On motion of Dr. Bateman, the BOARD adjourned subject to call of the Secretary.

FINANCIAL STATEMENT
OF THE
ILLINOIS STATE BOARD OF HEALTH,
FOR THE
FISCAL YEAR ENDED SEPTEMBER 30, 1888.

R. LUDLAM, } *Auditing Committee.*

MEDICAL PRACTICE IN ILLINOIS.

THE ILLINOIS MEDICAL PRACTICE ACT.

AN ACT to Regulate the Practice of Medicine in the State of Illinois.

Approved June 16, 1887. In force July 1, 1887.

QUALIFICATIONS FOR PRACTICE—DIPLOMA—EXAMINATION—CERTIFICATE OF STATE BOARD OF HEALTH.] Section 1. *Be it enacted by the People of the State of Illinois, represented in the General Assembly:* That no person shall practice medicine in any of its departments in this State unless such person possesses the qualifications required by this act.

If a graduate in medicine, he must present his diploma to the STATE BOARD OF HEALTH for verification as to its genuineness. If the diploma is found genuine, and from a legally-chartered medical institution in good standing, and if the person named therein be the person claiming and presenting the same, the STATE BOARD OF HEALTH shall issue a certificate to that effect signed by all the members thereof, and such certificate shall be conclusive as to the right of the lawful holder of the same to practice medicine in this State.

If not a graduate, the person practicing medicine in this State shall present himself before said BOARD and submit himself to such examination as the BOARD may require, and if the examination be satisfactory to the BOARD, the said BOARD shall issue its certificate in accordance with the facts, and the lawful holder of such certificate shall be entitled to all the rights and privileges herein mentioned.

STATE BOARD OF HEALTH—ORGANIZATION, ETC.—CERTIFICATES.] § 2. The STATE BOARD OF HEALTH shall organize within three months after the passage of this act; it shall procure a seal, and shall receive, through its secretary, applications for certificates and examinations; the president and secretary shall have the authority to administer oaths, and the BOARD to take testimony in all matters relating to its duties: it shall issue certificates to all who furnish satisfactory proof of having received diplomas or licenses from legally-chartered medical institutions in good standing as may be determined by the BOARD: it shall prepare three forms of certificates, one for persons in possession of such diplomas or licenses, the second for candidates examined and favorably passed on by the BOARD, and a third for persons to whom certificates may be issued as hereinafter provided in section 12 of this act: it shall furnish to the

county clerks of the several counties a list of all persons receiving certificates. In selecting places to hold its meetings, it shall, as far as is reasonable, accommodate applicants residing in different sections of the State, and due notice shall be published of all its meetings for examination.

Certificates shall be signed by all the members of the BOARD, and the Secretary of the BOARD shall receive from the applicant a fee of five (5) dollars for each certificate issued to such graduate or licentiate. Graduates or licentiates in midwifery to pay the sum of two (2) dollars for each certificate. All such fees for certificates shall be paid by the secretary into the treasury of the BOARD.

VERIFICATION OF DIPLOMA—AFFIDAVIT.] § 3. The verification of the diploma shall consist in the affidavit of the holder and applicant that he is the lawful possessor of the same, and that he is the person therein named. Such affidavit may be taken before any person authorized to administer oaths, and the same shall be attested under the hand and seal of such officer, if he have a seal; and any person swearing falsely shall be deemed guilty of perjury, and punished accordingly.

Graduates may present their diplomas and affidavits, as provided in this act, by letter or by proxy, and the STATE BOARD OF HEALTH shall issue its certificate the same as though the owner was present.

EXAMINATIONS BY BOARD.] § 4. All examinations of persons not graduates or licentiates, shall be made directly by the BOARD, and the certificates given by the BOARD shall authorize the possessor to practice medicine and surgery in the State of Illinois.

CERTIFICATE TO BE RECORDED.] § 5. Every person holding a certificate from the STATE BOARD OF HEALTH shall have it recorded in the office of the clerk of the county in which he resides, within three months from its date, and the date of recording shall be indorsed thereon. Until such certificate is recorded as herein provided, the holder thereof shall not exercise any of the rights or privileges conferred therein to practice medicine.

Any person removing to another county to practice, shall record the certificate in like manner in the county to which he removes, and the holder of the certificate shall pay to the county clerk the usual fee for making the record.

RECORD TO BE KEPT BY COUNTY CLERK.] § 6. The county clerk shall keep, in a book provided for the purpose, a complete list of the certificates recorded by him, with the date of the issue of the certificate. If the certificate be based on a diploma or license, he shall record the name of the medical institution conferring it, and the date when conferred. The register of the county clerk shall be open to public inspection during business hours.

FEES FOR EXAMINATIONS.] § 7. The fees for the examination of non-graduates shall be as follows: Twenty (20) dollars for an examination in medicine and surgery; ten (10) dollars for an examination in midwifery only; and said fees shall be paid into the treasury of the BOARD. If an

applicant fails to pass said examination his or her fee shall be returned. Upon successfully passing the examination the certificate of the BOARD shall be issued to the applicant without further charge.

CHARACTER OF EXAMINATION.] § 8. Examinations may be made in whole or in part in writing, and shall be of an elementary and practical character, but sufficiently strict to test the qualifications of the candidate as a practitioner.

REFUSAL OR REVOCATION OF CERTIFICATE.] § 9. The STATE BOARD OF HEALTH may refuse to issue the certificates provided for in section 2, to individuals guilty of unprofessional or dishonorable conduct and it may revoke such certificates for like causes. In all cases of refusal or revocation the applicant may appeal to the Governor, who may affirm or overrule the decision of the BOARD, and this decision shall be final.

DEFINITION OF PRACTICING PHYSICIAN.] § 10. Any person shall be regarded as practicing medicine, within the meaning of this act, who shall treat, operate on, or prescribe for any physical ailment of another. But nothing in this act shall be construed to prohibit service in cases of emergency, or the domestic administration of family remedies. And this act shall not apply to commissioned surgeons of the United States Army, Navy or Marine Hospital service in the discharge of their official duties.

ITINERANT VENDOR OF DRUGS, ETC.—LICENSE.] § 11. Any itinerant vendor of any drug, nostrum, ointment or appliance of any kind intended for the treatment of disease or injury, or who shall, by writing or printing, or any other method, profess to cure or treat disease or deformity, by any drug, nostrum, manipulation or other expedient, shall pay a license of one hundred (100) dollars per month into the treasury of the BOARD, to be collected by the STATE BOARD OF HEALTH, in the name of the People of the State of Illinois, for the use of said BOARD OF HEALTH. And it shall be lawful for the STATE BOARD OF HEALTH to issue such license on application made to the STATE BOARD OF HEALTH, such license to be signed by the President of the BOARD, and attested by the Secretary of the BOARD, with the seal of the BOARD.

Any such itinerant vendor who shall vend or sell any such drug, nostrum, ointment or appliance without having a license so to do, shall, if found guilty, be fined in any sum not less than one hundred dollars, and not exceeding two hundred dollars for each offense, to be recovered in an action of debt before any court of competent jurisdiction. But such BOARD may for sufficient cause refuse such license.

PENALTY FOR PRACTICING WITHOUT CERTIFICATE—USING ANOTHER'S DIPLOMA.] § 12. Any person practicing medicine or surgery in the State without the certificate issued by this BOARD, in compliance with the provisions of this act, shall for each and every instance of such practice forfeit and pay to the People of the State of Illinois, for the use of the said STATE BOARD OF HEALTH, the sum of one hundred (100) dollars for the first offense, and two hundred (200) dollars for each subsequent offense, the same to be recovered in an action of debt before any court of competent jurisdiction, and any person filing or attempting to file as his own the

diploma or certificate of another, or a forged affidavit of identification, shall be guilty of a felony, and upon conviction, shall be subject to such fine and imprisonment as are made and provided by the statutes of the State for the crime of forgery.

Provided, that all persons who have been practicing medicine continuously for ten years within this State prior to the taking effect of the act to which this is an amendment, and who have not, under said original act, obtained a certificate from the said BOARD OF HEALTH to practice medicine in this State, shall upon proper application to said BOARD OF HEALTH receive such certificate, unless it shall be ascertained and determined by said BOARD OF HEALTH that the person so applying for a certificate is of immoral character, or guilty of unprofessional or dishonorable conduct, in which case said BOARD OF HEALTH may reject such application.

And, provided, that such application for a certificate shall be made within six months after the taking effect of this act, and all persons holding a certificate on account of ten years' practice shall be subject to all the requirements and discipline of this act, and the act to which this is an amendment, in regard to their future conduct in the practice of medicine the same as all other persons holding certificates, and all persons not having applied for or received such certificate within six months after the taking effect of this act, and all persons whose applications have for the causes herein named been rejected or certificates revoked, shall, if they shall practice medicine, be deemed guilty of practicing in violation of law and shall suffer the penalties herein provided.

JUDGMENT UPON CONVICTION—APPEAL.] § 13. Upon conviction of either of the offenses mentioned in this act, the court shall, as a part of the judgment, order that the defendant be committed to the common jail of the county until the fine and costs are paid, and upon failure to pay the same immediately, the defendant shall be committed under said order.

Provided, that either party may appeal in the same time and manner as appeals may be taken in other cases, except that where an appeal is prayed in behalf of the People, no appeal bond shall be required to be filed, whether the appeal be from a justice of the peace, or from the county or circuit court, or from the appellate court. But it shall be sufficient in behalf of the People of the State of Illinois, for the use of the STATE BOARD OF HEALTH, to pray an appeal, and thereupon appeal may be had without bond or security.

REPEAL.] § 14. All acts and parts of acts inconsistent or in conflict with this act are hereby repealed.

MODE OF PROCEDURE UNDER THE ILLINOIS MEDICAL PRACTICE ACT.

Under the act to regulate the practice of medicine in the State of Illinois all practitioners are divided into two classes. First, graduates of "legally-chartered medical institutions in good standing, *as may be determined by the BOARD.*" [See section 2, Medical Practice Act.] Second, non-graduates who are required by the law to undergo an examination by the BOARD.

To be held "in good standing" in Illinois, medical colleges are required to comply with the following schedule, adopted and promulgated by the STATE BOARD OF HEALTH in July, 1887. This schedule took effect at the close of the sessions of 1890-91. No diploma issued since that date is accepted as the basis for a State certificate unless issued in accordance with this schedule.

The only other mode of obtaining a State certificate is through an examination by the BOARD.

SCHEDULE OF REQUIREMENTS.

I. *Conditions of Admission to Lecture Courses.*—1. Credible certificate of good moral standing. 2. Diploma of graduation from a good literary and scientific college, or high school, or a first-grade teacher's certificate. Lacking such evidence of preliminary education—a thorough examination in the branches of a good English education, including mathematics, English composition and elementary physics or natural philosophy.

II. *Branches of Medical Science to be included in the Course of Instruction.*—1. Anatomy. 2. Physiology. 3. Chemistry. 4. Materia Medica and Therapeutics. 5. Theory and Practice of Medicine. 6. Pathology. 7. Surgery. 8. Obstetrics and Gynecology. 9. Hygiene. 10. Medical Jurisprudence (Forensic Medicine).

III. *Length of Regular or Graduating Courses.*—1. The time occupied in the regular courses or sessions from which students are graduated shall not be less than five months, or twenty weeks, each. Three full courses.

of lectures, no two within one and the same year of time, shall be required for graduation with the degree of Doctor of Medicine.

IV. *Attendance and Examinations, or Quizzes.*—1. Regular attendance during each entire lecture course shall be required, allowance being made only for absence occasioned by the student's sickness, such absence not to exceed twenty per centum of the course. 2. Regular examinations or quizzes to be made by each lecturer or professor daily, or at least twice each week. 3. Final examinations on all branches—to be conducted, when practicable, by competent examiners other than the professors in each branch.

V. *Dissections, Clinics and Hospital Attendance.*—1. Each student shall have dissected during two courses. 2. Attendance during at least two terms of clinical and hospital instruction shall be required.

VI. *Time of Professional Studies.*—This shall not be less than four full years before graduation, including the time spent with a preceptor, and attendance upon lectures or at clinics and hospitals.

VII. *Instruction.*—The college must show that it has a sufficient and competent corps of instructors, and the necessary facilities for teaching, dissections, clinics, etc.

APPENDED is all needful information as to the course of procedure to be observed in applying for a State certificate and complying with the law.

1. APPLICATIONS FOR CERTIFICATES, ETC.: Applications for certificates, or for blank affidavits, should be made to the Secretary at Springfield. The county clerks are also furnished with blank affidavits, or may obtain the same on application to the Secretary.

A special form of affidavit has been prepared for those who have lost their diplomas by fire or otherwise, and may be had on application as above.

Diplomas or licenses for verification, and affidavits properly filled out and acknowledged, together with the necessary letters of recommendation and fees for certificates, should be sent to the Secretary.

For convenience, diplomas may be presented to any member of the BOARD for verification*. In such case the affidavit should be endorsed "Diploma verified," with the signature of the member, before being forwarded to the Secretary.

2. DIPLOMA OR LICENSE TO BE PRESENTED FOR VERIFICATION: The law requires that graduates of medicine, or those who have licenses from legally chartered medical institutions in good standing, must actually pre-

* The members of the BOARD, 1892, are: Drs. W. A. Haskell, Alton; A. L. Clark, Elgin; B. M. Grimth, Springfield; R. Ludlam, Chicago; W. R. Mackenzie, Chester; D. H. Williams, Chicago; and F. W. Reilly, Springfield.

sent for verification, to the STATE BOARD, their diplomas or licenses; and, in addition, such other satisfactory proofs as may be necessary. Graduates may present their diplomas or licenses and affidavits by letter or proxy.

3. **AFFIDAVITS REQUIRED:** Affidavit must be made that the person presenting the diploma, or license, is the lawful possessor of the same. The affidavit should state date and place of graduation, and name of medical college; length of practice in this State, as well as present place of residence.

4. **FEE FOR CERTIFICATES:** The fee for a certificate of graduation is fixed by law at five dollars.

5. **EXAMINATION OF NON-GRADUATES:** It is required by law that all persons who are not graduates in medicine or licentiates, shall, before beginning practice, be examined directly by the BOARD, which is authorized to issue State certificates to those passing the examination.

6. **APPLICATION FOR EXAMINATION:** The candidate for examination must fill out a blank form, which may be obtained on application to the Secretary. This must be sent to the office of the BOARD and, if approved, the candidate will be notified when and where to appear for examination.

7. **FEE FOR EXAMINATION:** Candidates for examination are required to pay a fee of twenty dollars, in advance—to be returned if the certificate be refused.

8. **CHARACTER OF EXAMINATION:** Examinations may be made, in whole or in part, in writing; and shall be of an elementary and practical character, but sufficiently strict to test the qualifications of the candidate as a practitioner.

9. **EXAMINATIONS TO BE MADE IN PROPRIA PERSONA:** Candidates for examination must present themselves in person before the BOARD. No examination papers can be sent out to individuals; and no examination can be limited to any one or two special topics, or branches of study or practice. The examinations will be conducted by the entire BOARD, and upon all branches usually taught in medical schools.

10. **SCHOOLS OF PRACTICE IN EXAMINATION:** Questions relating to special methods or forms of practice or therapeutics will be referred for examination to the various individual members of the BOARD, as may be indicated.

11. **EXAMINATION IN A FOREIGN LANGUAGE:** Those desiring to be examined in any other but the English language may, in the discretion of the BOARD, be examined through interpreters, furnished at their own expense and approved by the BOARD.

12. **NON-GRADUATES MUST HAVE STUDIED FOUR YEARS:** Candidates for examination must present evidence that they have studied medicine at least four years.

13. **EVIDENCE OF MORAL AND PROFESSIONAL STANDING:** All applicants for certificates, whether holding diplomas or not, are required to furnish satisfactory evidence of good moral and professional standing; such evidence (letters of recommendation,) to be filed in the office of the BOARD as part of the applicant's professional record.

14. **CERTIFICATES TO BE RECORDED IN OFFICE OF COUNTY CLERK:** Physicians are required to have *recorded*, in the office of the county clerk, the State certificate which may be received from the STATE BOARD OF HEALTH; and in case of removal to another county in the State, to have the certificate recorded in that county also.

Section 4 of the STATE BOARD OF HEALTH act requires that all physicians and midwives, without exception, practicing in this State, shall *register* their names and post-office addresses with the county clerk of the county in which they reside. This register is additional to, and independent of, the *record* of the State certificate of the BOARD, and is obligatory in each county into which the physician's or midwife's practice extends.

15. **PHYSICIANS TO REGISTER IN EACH COUNTY:** In case a physician practices in any other county than that in which he lives—he having recorded his certificate in his own county—it is not required that he have his certificate recorded in such other county or counties. He must, however, register his name in the county or counties in which his practice extends, and make his returns of births and deaths occurring in those counties to the respective county clerks. In cases of professional consultation only, with resident physicians, such registration is not required.

16. **NON-RESIDENT PHYSICIANS PRACTICING IN THIS STATE AMENABLE TO THE LAW:** Physicians, residents of adjoining States, who practice in this State in counties adjoining the one in which they reside, are required to take out State certificates of practice, as required of residents of this State. They must record the same in the office of the county clerk of the county or counties in which their practice extends; make returns of births and deaths in those counties to the county clerks, and in every respect conform to all the requirements of the law incumbent upon residents of this State.

17. **CHANGE OF LOCATION:** It is important that when a change of location is made, it be promptly reported to the BOARD. Unless this is done, the official register will necessarily be incorrect.

18. **PROFESSIONAL ACTS ILLEGAL PRIOR TO RECORD OF CERTIFICATE:** No one has a right to practice until the State certificate of the BOARD is placed upon record in the county in which the individual lives. All professional acts, prior to this being done, are illegal and render the delinquent liable to prosecution.

19. WHAT CONSTITUTES "PRACTICING MEDICINE" UNDER THE STATUTE: The tenth section of the act to regulate the practice of medicine in the State of Illinois recites that "any person shall be regarded as practicing medicine, within the meaning of this act, who shall treat, operate on, or prescribe for any physical ailment of another."

Independently of the statutory definition, the term imports and embraces the pursuit and vocation of one who holds himself out to the public as possessing the requisite skill to treat disease, and accordingly prescribes for or treats patients as a physician. (Opinion of Attorney General Edsall, July 23, 1880.)

20. GRATUITOUS PRACTICE DOES NOT EXEMPT FROM THE LAW: If a person "practices medicine," as defined by the statute, without complying with the law, it is wholly immaterial whether he charges for his services or not. He is guilty of a violation of the law, and liable to prosecution. This, however, does not apply to gratuitous services rendered in a case of emergency by a non-qualified person.

Following is the form of affidavit to be made by a graduate or licentiate applicant for the State certificate:

INSTRUCTIONS.

STATE CERTIFICATES, authorizing the practice of medicine and surgery in the State of Illinois, are issued by the STATE BOARD OF HEALTH on complying with the following requirements, based upon the *Amended Medical Practice Act*, in force July 1, 1887.

1. The applicant must present to the STATE BOARD, at the office of the Secretary, in Springfield, or to any member of the BOARD the *Diploma* or *License* of a legally-chartered medical institution in *good standing*—See next column for definition of “colleges in good standing.” Such diploma or license may be presented in person, or may be sent by mail or express. It is safer to send by express.

2. Said diploma or license must be accompanied by the *Affidavit* of the holder and applicant that he, or she, is the lawful possessor of the same, and is the person named therein.

3. No *Certificate* will be issued without *Letters of Recommendation* with regard to the moral and professional character of the applicant, from at least two reputable medical men who live in Illinois, or if from non-residents of the State such letters must be endorsed by reputable medical men of Illinois.

4. A *fee of five dollars* must be paid in advance. If not paid in person, a receipt should be obtained from the agency by which it is transmitted.

COLLEGES IN GOOD STANDING.

Colleges to be held in good standing in Illinois must comply with the following schedule of requirements. This schedule took effect at the close of the sessions of 1890-91. No diploma issued since that date will be accepted as the basis for a certificate unless issued in accordance with this schedule.

The only other mode of obtaining a State Certificate is through an examination by the BOARD.

SCHEDULE OF REQUIREMENTS.

I. Conditions of Admission to Lecture Courses.—1. Credible certificate of good moral standing. 2. Diploma of graduation from a good literary and scientific college or high school, or a first-grade teacher's certificate. Lacking such evidence of preliminary education—a thorough examination in the branches of a good English education, including mathematics, English composition and elementary physics or natural philosophy.

II. Branches of Medical Science to be included in the Course of Instruction.—1. Anatomy. 2. Physiology. 3. Chemistry. 4. Materia Medica and Therapeutics. 5. Theory and Practice of Medicine. 6. Pathology. 7. Surgery. 8. Obstetrics and Gynecology. 9. Hygiene. 10. Medical Jurisprudence (Forensic Medicine).

III. Length of Regular Graduating Courses.—1. The time occupied in the regular courses or sessions from which students are graduated shall not be less than five months, or twenty weeks, each. 2. Three full courses of lectures, no two within one and the same year of time, shall be required for graduation with the degree of Doctor of Medicine.

IV. Attendance and Examinations or Quizzes.—1. Regular attendance during each entire lecture course shall be required, allowance being made only for absence occasioned by the student's sickness, such absence not to exceed twenty per centum of the course. 2. Regular examinations or quizzes to be made by each lecturer or professor daily, or at least twice each week. 3. Final examinations on all branches—to be conducted, when practicable, by competent examiners other than the professors in each branch.

V. Dissections, Clinics and Hospital Attendance.—1. Each student shall have dissected during two courses. 2. Attendance during at least two terms of clinical and hospital instruction shall be required.

VI. Time of Professional Studies.—This shall not be less than four full years before graduation, including the time spent with a preceptor, and attendance upon lectures or at clinics and hospitals.

VII. Instruction.—The college must show that it has a sufficient and competent corps of instructors, and the necessary facilities for teaching, dissections, clinics, etc.

[Outer folds of Application.]

STATE CERTIFICATE NO.

Issued..... 189.....

ILLINOIS STATE BOARD OF HEALTH.

MEDICAL PRACTICE ACT.

NON-GRADUATE EXAMINATION.

Application of

INSTRUCTIONS.

1. The applicant must fill out in his own hand-writing the numbered blanks—from 1 to 9—of the within form, and forward the same, to the Secretary at Springfield, on or before the first of April.

2. With the application must be furnished letters of recommendation, as to moral and professional character, from two reputable physicians practicing in Illinois. Blanks for letters of recommendation may be obtained with the blank application.

3. The fee prescribed by law must accompany the application. Unless paid in person the fee should be transmitted by postal money order, draft or check made payable to the *Secretary of the State Board of Health*. No responsibility will be assumed for fees transmitted by mail in any other form.

4. On receipt of application, letters of recommendation and fee, and upon the approval of the President of the BOARD, the Secretary will notify the applicant when and where to appear for examination.

5. If the applicant has a literary or scientific degree, or a first-grade teacher's certificate, the diploma or certificate must be presented at the examination. Not possessing such diploma or certificate the applicant must pass a satisfactory examination in the branches of a good English education, including mathematics, English composition and general physics.

6. If the applicant has special views of theory and practice of medicine or of therapeutics, a special examination in such branches will be held if requested. Examinations are conducted in the English language; if made in any other an interpreter must be furnished at the expense of the applicant.

Extracts from the Medical Practice Act.—

"Candidates for examination shall pay a fee of twenty dollars (\$20), in advance, which shall be returned to them if a certificate be refused."

"Examinations may be made in whole or in part in writing, and shall be of an elementary and practical character, but sufficiently strict to test the qualifications of the candidate as a practitioner."

"All examinations of persons, not graduates or licentiates, shall be made directly by the BOARD, and the certificates given by the BOARD, shall authorize the possessor to practice medicine and surgery in the State of Illinois."

Examinations are held once each year—during the April session of the BOARD.

For further information, blanks, etc., address "*Secretary State Board of Health, Springfield, Ill.*"

INSTRUCTIONS.

State certificates authorizing the practice of midwifery in the State of Illinois, are issued by the STATE BOARD OF HEALTH on complying with the following requirements, based upon the Amended Medical Practice Act, in force July 1, 1887:

1. The applicant must make the within affidavit and forward the same directed to the Secretary of the STATE BOARD OF HEALTH, Springfield, Illinois. Blank copies of the affidavit may be obtained from any member of the STATE BOARD OF HEALTH, or from any county clerk, or from the Secretary at Springfield.

2. With the affidavit must be furnished letters of recommendation, as to moral and professional character, from two reputable physicians practicing in Illinois. Blanks for letters of recommendation may be obtained with the blank affidavit.

3. If the applicant is a graduate or licentiate in midwifery she must forward her diploma or license with affidavit and letters.

4. The fees fixed by law for a State certificate and midwife examination are as follows: To a graduate or licentiate in midwifery, two dollars (\$2); to all others ten dollars (\$10).

5. On receipt of affidavit, letters of recommendation, diploma or license (if any) and fee the Secretary will notify the applicant when and where to appear for examination. No examination will be authorized until the affidavit, letters, diploma or license (if any) and fee have been received.

N. B. Unless paid in person the fee should be transmitted by postal money order, draft or check made payable to the Secretary of the STATE BOARD OF HEALTH. No responsibility will be assumed for fees transmitted by mail in any other form.

CONCERNING EXAMINATIONS.

All applicants for the State certificate conferring the right to practice midwifery in Illinois—besides presenting proof of good moral character—must also pass a satisfactory examination by the BOARD in the following branches: 1. Anatomy of the pelvis and of the generative organs of woman. 2. Physiology of menstruation and conception. 3. The signs of pregnancy. 4. Mechanism of labor. 5. Management of normal labor. 6. Management of abnormal labor. 7. Puerperal hygiene and antisepsis. 8. Special care of mother and infant.

An applicant who desires the examination conducted in any other than the English language may, in the discretion of the BOARD, furnish an interpreter at her own expense and subject to the approval of the BOARD.

TOTAL.....	AVERAGE.....

13. **EVIDENCE OF MORAL AND PROFESSIONAL STANDING:** All applicants for certificates, whether holding diplomas or not, are required to furnish satisfactory evidence of good moral and professional standing; such evidence (letters of recommendation,) to be filed in the office of the BOARD as part of the applicant's professional record.

14. **CERTIFICATES TO BE RECORDED IN OFFICE OF COUNTY CLERK:** Physicians are required to have *recorded*, in the office of the county clerk, the State certificate which may be received from the STATE BOARD OF HEALTH; and in case of removal to another county in the State, to have the certificate recorded in that county also.

Section 4 of the STATE BOARD OF HEALTH act requires that all physicians and midwives, without exception, practicing in this State, shall *register* their names and post-office addresses with the county clerk of the county in which they reside. This register is additional to, and independent of, the *record* of the State certificate of the BOARD, and is obligatory in each county into which the physician's or midwife's practice extends.

15. **PHYSICIANS TO REGISTER IN EACH COUNTY:** In case a physician practices in any other county than that in which he lives—he having recorded his certificate in his own county—it is not required that he have his certificate recorded in such other county or counties. He must, however, register his name in the county or counties in which his practice extends, and make his returns of births and deaths occurring in those counties to the respective county clerks. In cases of professional consultation only, with resident physicians, such registration is not required.

16. **NON-RESIDENT PHYSICIANS PRACTICING IN THIS STATE AMENABLE TO THE LAW:** Physicians, residents of adjoining States, who practice in this State in counties adjoining the one in which they reside, are required to take out State certificates of practice, as required of residents of this State. They must record the same in the office of the county clerk of the county or counties in which their practice extends; make returns of births and deaths in those counties to the county clerks, and in every respect conform to all the requirements of the law incumbent upon residents of this State.

17. **CHANGE OF LOCATION:** It is important that when a change of location is made, it be promptly reported to the BOARD. Unless this is done, the official register will necessarily be incorrect.

18. **PROFESSIONAL ACTS ILLEGAL PRIOR TO RECORD OF CERTIFICATE:** No one has a right to practice until the State certificate of the BOARD is placed upon record in the county in which the individual lives. All professional acts, prior to this being done, are illegal and render the delinquent liable to prosecution.

19. WHAT CONSTITUTES "PRACTICING MEDICINE" UNDER THE STATUTE: The tenth section of the act to regulate the practice of medicine in the State of Illinois recites that "any person shall be regarded as practicing medicine, within the meaning of this act, who shall treat, operate on, or prescribe for any physical ailment of another."

Independently of the statutory definition, the term imports and embraces the pursuit and vocation of one who holds himself out to the public as possessing the requisite skill to treat disease, and accordingly prescribes for or treats patients as a physician. (Opinion of Attorney General Edsall, July 23, 1880.)

20. GRATUITOUS PRACTICE DOES NOT EXEMPT FROM THE LAW: If a person "practices medicine," as defined by the statute, without complying with the law, it is wholly immaterial whether he charges for his services or not. He is guilty of a violation of the law, and liable to prosecution. This, however, does not apply to gratuitous services rendered in a case of emergency by a non-qualified person.

Following is the form of affidavit to be made by a graduate or licentiate applicant for the State certificate:

INSTRUCTIONS.

STATE CERTIFICATES, authorizing the practice of medicine and surgery in the State of Illinois, are issued by the STATE BOARD OF HEALTH on complying with the following requirements, based upon the *Amended Medical Practice Act*, in force July 1, 1887.

1. The applicant must present to the STATE BOARD, at the office of the Secretary, in Springfield, or to any member of the BOARD the *Diploma or License* of a legally-chartered medical institution in *good standing*—See next column for definition of “colleges in good standing.” Such diploma or license may be presented in person, or may be sent by mail or express. It is safer to send by express.

2. Said diploma or license must be accompanied by the *Affidavit* of the holder and applicant that he, or she, is the lawful possessor of the same, and is the person named therein.

3. No *Certificate* will be issued without *Letters of Recommendation* with regard to the moral and professional character of the applicant, from at least two reputable medical men who live in Illinois, or if from non-residents of the State such letters must be endorsed by reputable medical men of Illinois.

4. A *fee of five dollars* must be paid in advance. If not paid in person, a receipt should be obtained from the agency by which it is transmitted.

COLLEGES IN GOOD STANDING.

Colleges to be held in good standing in Illinois must comply with the following schedule of requirements. This schedule took effect at the close of the sessions of 1890-91. No diploma issued since that date will be accepted as the basis for a certificate unless issued in accordance with this schedule.

The only other mode of obtaining a State Certificate is through an examination by the BOARD.

SCHEDULE OF REQUIREMENTS.

I. Conditions of Admission to Lecture Courses.—1. Credible certificate of good moral standing. 2. Diploma of graduation from a good literary and scientific college or high school, or a first-grade teacher's certificate. Lacking such evidence of preliminary education—a thorough examination in the branches of a good English education, including mathematics, English composition and elementary physics or natural philosophy.

II. Branches of Medical Science to be included in the Course of Instruction.—1. Anatomy. 2. Physiology. 3. Chemistry. 4. Materia Medica and Therapeutics. 5. Theory and Practice of Medicine. 6. Pathology. 7. Surgery. 8. Obstetrics and Gynecology. 9. Hygiene. 10. Medical Jurisprudence (Forensic Medicine).

III. Length of Regular Graduating Courses.—1. The time occupied in the regular courses or sessions from which students are graduated shall not be less than five months, or twenty weeks, each. 2. Three full courses of lectures, no two within one and the same year of time, shall be required for graduation with the degree of Doctor of Medicine.

IV. Attendance and Examinations or Quizzes.—1. Regular attendance during each entire lecture course shall be required, allowance being made only for absence occasioned by the student's sickness, such absence not to exceed twenty per centum of the course. 2. Regular examinations or quizzes to be made by each lecturer or professor daily, or at least twice each week. 3. Final examinations on all branches—to be conducted, when practicable, by competent examiners other than the professors in each branch.

V. Dissections, Clinics and Hospital Attendance.—1. Each student shall have dissected during two courses. 2. Attendance during at least two terms of clinical and hospital instruction shall be required.

VI. Time of Professional Studies.—This shall not be less than four full years before graduation, including the time spent with a preceptor, and attendance upon lectures or at clinics and hospitals.

VII. Instruction.—The college must show that it has a sufficient and competent corps of instructors, and the necessary facilities for teaching, dissections, clinics, etc.

COLLEGES IN GOOD STANDING.

Colleges to be held in good standing in Illinois must comply with the following schedule of requirements. This schedule took effect at the close of the sessions of 1890-91. No diploma issued since that date will be accepted as the basis for a certificate unless issued in accordance with this schedule.

The only other mode of obtaining a State Certificate is through an examination by the BOARD.

SCHEDULE OF REQUIREMENTS.

I. Conditions of Admission to Lecture Courses.—1. Credible certificate of good moral standing. 2. Diploma of graduation from a good literary and scientific college or high school, or a first-grade teacher's certificate. Lacking such evidence of preliminary education—a thorough examination in the branches of a good English education, including mathematics, English composition and elementary physics or natural philosophy.

II. Branches of Medical Science to be included in the Course of Instruction.—1. Anatomy. 2. Physiology. 3. Chemistry. 4. Materia Medica and Therapeutics. 5. Theory and Practice of Medicine. 6. Pathology. 7. Surgery. 8. Obstetrics and Gynecology. 9. Hygiene. 10. Medical Jurisprudence (Forensic Medicine).

III. Length of Regular Graduating Courses.—1. The time occupied in the regular courses or sessions from which students are graduated shall not be less than five months, or twenty weeks, each. 2. Three full courses of lectures, no two within one and the same year of time, shall be required for graduation with the degree of Doctor of Medicine.

IV. Attendance and Examinations or Quizzes.—1. Regular attendance during each entire lecture course shall be required, allowance being made only for absence occasioned by the student's sickness, such absence not to exceed twenty per centum of the course. 2. Regular examinations or quizzes to be made by each lecturer or professor daily, or at least twice each week. 3. Final examinations on all branches—to be conducted, when practicable, by competent examiners other than the professors in each branch.

V. Dissections, Clinics and Hospital Attendance.—1. Each student shall have dissected during two courses. 2. Attendance during at least two terms of clinical and hospital instruction shall be required.

VI. Time of Professional Studies.—This shall not be less than four full years before graduation, including the time spent with a preceptor, and attendance upon lectures or at clinics and hospitals.

VII. Instruction.—The college must show that it has a sufficient and competent corps of instructors, and the necessary facilities for teaching, dissections, clinics, etc.

STATE CERTIFICATE No.

Issued....., 189.....

ILLINOIS STATE BOARD OF HEALTH.

MEDICAL PRACTICE ACT.

NON-GRADUATE EXAMINATION.

Application of

INSTRUCTIONS.

1. The applicant must fill out in his own hand-writing the numbered blanks—from 1 to 9—of the within form, and forward the same, to the Secretary at Springfield, on or before the first of April.

2. With the application must be furnished letters of recommendation, as to moral and professional character, from two reputable physicians practicing in Illinois. Blanks for letters of recommendation may be obtained with the blank application.

3. The fee prescribed by law must accompany the application. Unless paid in person the fee should be transmitted by postal money order, draft or check made payable to the *Secretary of the State Board of Health*. No responsibility will be assumed for fees transmitted by mail in any other form.

4. On receipt of application, letters of recommendation and fee, and upon the approval of the President of the BOARD, the Secretary will notify the applicant when and where to appear for examination.

5. If the applicant has a literary or scientific degree, or a first-grade teacher's certificate, the diploma or certificate must be presented at the examination. Not possessing such diploma or certificate the applicant must pass a satisfactory examination in the branches of a good English education, including mathematics, English composition and general physics.

6. If the applicant has special views of theory and practice of medicine or of therapeutics, a special examination in such branches will be held if requested. Examinations are conducted in the English language; if made in any other an interpreter must be furnished at the expense of the applicant.

Extracts from the Medical Practice Act.—

"Candidates for examination shall pay a fee of twenty dollars (\$20), in advance, which shall be returned to them if a certificate be refused."

"Examinations may be made in whole or in part in writing, and shall be of an elementary and practical character, but sufficiently strict to test the qualifications of the candidate as a practitioner."

"All examinations of persons, not graduates or licentiates, shall be made directly by the BOARD, and the certificates given by the BOARD, shall authorize the possessor to practice medicine and surgery in the State of Illinois."

Examinations are held once each year—during the April session of the BOARD.

For further information, blanks, etc., address "*Secretary State Board of Health, Springfield, Ill.*"

INSTRUCTIONS.

State certificates authorizing the practice of midwifery in the State of Illinois, are issued by the STATE BOARD OF HEALTH on complying with the following requirements, based upon the Amended Medical Practice Act, in force July 1, 1887:

1. The applicant must make the within affidavit and forward the same directed to the Secretary of the STATE BOARD OF HEALTH, Springfield, Illinois. Blank copies of the affidavit may be obtained from any member of the STATE BOARD OF HEALTH, or from any county clerk, or from the Secretary at Springfield.

2. With the affidavit must be furnished letters of recommendation, as to moral and professional character, from two reputable physicians practicing in Illinois. Blanks for letters of recommendation may be obtained with the blank affidavit.

3. If the applicant is a graduate or licentiate in midwifery she must forward her diploma or license with affidavit and letters.

4. The fees fixed by law for a State certificate and midwife examination are as follows: To a graduate or licentiate in midwifery, two dollars (\$2); to all others ten dollars (\$10).

5. On receipt of affidavit, letters of recommendation, diploma or license (if any) and fee the Secretary will notify the applicant when and where to appear for examination. No examination will be authorized until the affidavit, letters, diploma or license (if any) and fee have been received.

N. B. Unless paid in person the fee should be transmitted by postal money order, draft or check made payable to the Secretary of the STATE BOARD OF HEALTH. No responsibility will be assumed for fees transmitted by mail in any other form.

CONCERNING EXAMINATIONS.

All applicants for the State certificate conferring the right to practice midwifery in Illinois—besides presenting proof of good moral character—must also pass a satisfactory examination by the BOARD in the following branches: 1. Anatomy of the pelvis and of the generative organs of woman. 2. Physiology of menstruation and conception. 3. The signs of pregnancy. 4. Mechanism of labor. 5. Management of normal labor. 6. Management of abnormal labor. 7. Puerperal hygiene and antisepsis. 8. Special care of mother and infant.

An applicant who desires the examination conducted in any other than the English language may, in the discretion of the BOARD, furnish an interpreter at her own expense and subject to the approval of the BOARD.

RESULTS OF EXAMINATION.

Eighty per cent. of correct answers required to

13. EVIDENCE OF MORAL AND PROFESSIONAL STANDING: All applicants for certificates, whether holding diplomas or not, are required to furnish satisfactory evidence of good moral and professional standing; such evidence (letters of recommendation,) to be filed in the office of the BOARD as part of the applicant's professional record.

14. CERTIFICATES TO BE RECORDED IN OFFICE OF COUNTY CLERK: Physicians are required to have *recorded*, in the office of the county clerk, the State certificate which may be received from the STATE BOARD OF HEALTH; and in case of removal to another county in the State, to have the certificate recorded in that county also.

Section 4 of the STATE BOARD OF HEALTH act requires that all physicians and midwives, without exception, practicing in this State, shall *register* their names and post-office addresses with the county clerk of the county in which they reside. This register is additional to, and independent of, the *record* of the State certificate of the BOARD, and is obligatory in each county into which the physician's or midwife's practice extends.

15. PHYSICIANS TO REGISTER IN EACH COUNTY: In case a physician practices in any other county than that in which he lives—he having recorded his certificate in his own county—it is not required that he have his certificate recorded in such other county or counties. He must, however, register his name in the county or counties in which his practice extends, and make his returns of births and deaths occurring in those counties to the respective county clerks. In cases of professional consultation only, with resident physicians, such registration is not required.

16. NON-RESIDENT PHYSICIANS PRACTICING IN THIS STATE AMENABLE TO THE LAW: Physicians, residents of adjoining States, who practice in this State in counties adjoining the one in which they reside, are required to take out State certificates of practice, as required of residents of this State. They must record the same in the office of the county clerk of the county or counties in which their practice extends; make returns of births and deaths in those counties to the county clerks, and in every respect conform to all the requirements of the law incumbent upon residents of this State.

17. CHANGE OF LOCATION: It is important that when a change of location is made, it be promptly reported to the BOARD. Unless this is done, the official register will necessarily be incorrect.

18. PROFESSIONAL ACTS ILLEGAL PRIOR TO RECORD OF CERTIFICATE: No one has a right to practice until the State certificate of the BOARD is placed upon record in the county in which the individual lives. All professional acts, prior to this being done, are illegal and render the delinquent liable to prosecution.

19. WHAT CONSTITUTES "PRACTICING MEDICINE" UNDER THE STATUTE: The tenth section of the act to regulate the practice of medicine in the State of Illinois recites that "any person shall be regarded as practicing medicine, within the meaning of this act, who shall treat, operate on, or prescribe for any physical ailment of another."

Independently of the statutory definition, the term imports and embraces the pursuit and vocation of one who holds himself out to the public as possessing the requisite skill to treat disease, and accordingly prescribes for or treats patients as a physician. (Opinion of Attorney General Edsall, July 23, 1880.)

20. GRATUITOUS PRACTICE DOES NOT EXEMPT FROM THE LAW: If a person "practices medicine," as defined by the statute, without complying with the law, it is wholly immaterial whether he charges for his services or not. He is guilty of a violation of the law, and liable to prosecution. This, however, does not apply to gratuitous services rendered in a case of emergency by a non-qualified person.

Following is the form of affidavit to be made by a graduate or licentiate applicant for the State certificate:

INSTRUCTIONS.

STATE CERTIFICATES, authorizing the practice of medicine and surgery in the State of Illinois, are issued by the STATE BOARD OF HEALTH on complying with the following requirements, based upon the *Amended Medical Practice Act*, in force July 1, 1887.

1. The applicant must present to the STATE BOARD, at the office of the Secretary, in Springfield, or to any member of the BOARD the *Diploma or License* of a legally-chartered medical institution in *good standing*—See next column for definition of “colleges in good standing.” Such diploma or license may be presented in person, or may be sent by mail or express. It is safer to send by express.

2. Said diploma or license must be accompanied by the *Affidavit* of the holder and applicant that he, or she, is the lawful possessor of the same, and is the person named therein.

OFFICIAL REGISTER.

PHYSICIANS.

MEDICAL INSTITUTIONS REPRESENTED IN THE OFFICIAL REGISTER OF PHYSICIANS.

"BASIS OF ISSUE" OF THE STATE CERTIFICATE.

In order to reduce the bulk of the Official Register, and so to keep within the number of pages (300) prescribed by the statute, sundry data heretofore given are omitted or condensed in the following pages. The most important of these changes consists in the substitution of numbers for the titles of medical institutions, examining bodies and other authority for the issue of the State Certificate. These numbers—see column "Basis of Issue"—refer to the corresponding numbers in the following list of titles.

For example: The first name in the Register has, under the heading "State Certificate" and in the column "Basis of Issue," the number "30." This indicates that the basis of issue of the State Certificate was a diploma of the institution numbered "30" in the subjoined list of titles:

1. Academy of Medicine, Paris, France.
2. Albany Medical College, Albany, N. Y.
3. American Medical College, Cincinnati, O.
4. American Medical College, St. Louis, Mo.
5. Baltimore Medical College, Baltimore, Md.
6. Beaumont Hospital Medical College, St. Louis, Mo.
7. Bellevue Hospital Medical College, New York City, N. Y.
8. Bennett College of Eclectic Medicine and Surgery, Chicago, Ill.
9. Berkshire Medical College, Pittsfield, Mass.
10. Boston University School of Medicine, Boston, Mass.
11. Botanico-Medical College of Ohio, Cincinnati, O.
12. Carolinen Medico-Chirurgical Institute, Stockholm, Sweden.
13. Castleton Medical College, Castleton, Vt.
14. Central Medical College, Indianapolis, Ind.
15. Central Medical College, Syracuse, N. Y.
16. Certificate of Examination of Medical Authorities, Lomsha, Russia.
